26th-29th June 2019

Detailed Programme

(Updated 12 June 2019)

Please note that session schedules can be subject to change.
To access the latest updated programme, please go to
<http://www.fleximeets.com/eaere2019/?p=programme>

Registration

Wednesday 16:00-19:00

University Place, Drum
Area

Welcome Reception

Wednesday, 18.00-20.00

Drinks and buffet

Whitworth Hall

PARALLEL SESSION 1
THU 8:30-10:15

Parallel session 1

Thursday, 08.30-10.15

THEMATIC SESSION: ENVIRONMENTAL INNOVATION AND ECONOMIC PERFORMANCE

Room: Lecture Theatre A

Organizer(s): Antoine Dechezlepretre, OECD; Misato Sato, London School of Economics

Chair: Antoine Dechezlepretre, OECD

Investments in low carbon technologies and capital assets need to be rapidly scaled up to meet climate change mitigation targets, and private sector firms are likely to play a key role. Yet current uptake of low carbon investment is woefully lacking. The extant economic literature on the behaviour of firms in the provision of global public goods (e.g. through clean innovation) focuses on the cost channel, and tests the theory that adopting or developing cleaner technologies is associated with high up-front costs but can improve efficiency and reduce costs (e.g. energy costs). More recent literature exploits new firm level databases, and also explores the revenue channel - how the "greening" of firms affects their profitability and market valuation - testing the Porter hypothesis, that pushing environmental innovation frontiers can bring competitive advantage to firms. This thematic session combines three empirical papers that use unique micro-datasets and advance the economic literature by contributing vital evidence on the drivers and financial performance of firms in the 'low carbon economy' thus highlighting the changes necessary to leverage large scale spending from the private sector to enable the low carbon transition. The three papers take complementary perspectives on the innovation behaviour and financial performance of firms in the green economy. They thus contribute to a sound understanding of the intersection of environmental policy and industrial strategy that is of high importance for climate policymaking as well as for a broader economic audience.

Determinants of environmental product and process innovations: New evidence on the basis of European panel data

Gunnar Gutsche, University of Kassel; Andreas Ziegler, University of Kassel

Clean vs dirty innovation and stock market returns

Antoine Dechezlepretre, OECD; Cal Muckley, University College Dublin; Parvati Neelakantan, University College Dublin

Does "Going Green" Pay? Evidence from a Global Firm Level Dataset

Misato Sato, London School of Economics; Tobias Kruse, London School of Economics; Myra Mohnen, University of Essex; Peter Pope, University of Bocconi

THEMATIC SESSION: REGULATING MEAT CONSUMPTION

Room: Room 2.220

Organizer(s): Grischa Perino, University of Hamburg; Nicolas Treich, Toulouse School of Economics and INRA

Chair: Grischa Perino, University of Hamburg

A number of environmental, health and demographic pressures as well as evolving societal changes justify regulating meat consumption. However, the efforts to regulate meat consumption seem quite limited in comparison to the external costs of meat and to the regulation of other sectors such as transport or other polluting industries. This thematic session will assess how regulatory interventions and especially provision of information and exposure to different arguments put forward in the public debate on sustainable consumption can efficiently reduce meat consumption. The papers in this session focus on several aspects of the regulatory challenge and use complementary methodological approaches: conceptual and experimental evidence from both the field and the lab on what motivates people to reduce their meat consumption.

Regulating Meat Consumption: How to Improve Health, Environment and Animal Welfare?

Nicolas Treich, Toulouse School of Economics; Vincent Requillart, TSE INRA; Zohra Bouamra, TSE INRA; Celine Bonnet, TSE INRA

Meaty arguments and fishy associations: Field experimental evidence on the impact of reasons to reduce meat consumption on intentions, behavior and satisfaction

Grischa Perino, University of Hamburg; **Claudia Schwirplies**, University of Hamburg

Does information on healthiness, carbon footprint and meat content affect willingness to pay for ready meals? Evidence from non-hypothetical discrete choice experiments

Simone Cerroni, Queen's University Belfast; Jennie Macdiarmid, University of Aberdeen

POLICY SESSION: ACCELERATING THE TRANSITION TO ELECTRIC ROAD TRANSPORT: BARRIERS, POLICY ENABLERS AND CAVEATS

Room: Room 1.218

Organizer(s): Walid Oueslati, OECD; Alexandros Dimitropoulos, OECD

Chair: Walid Oueslati, OECD

Road transport is a major source of greenhouse gas emissions and air pollution damaging to health. Electric vehicles (EVs) have tremendous potential to reduce such tailpipe emissions, allowing society to focus on reducing emissions from electricity generation, manufacturing and non-exhaust transport sources. Despite rapid growth in sales of EVs in the past five years, barriers to their adoption remain, and identifying efficient policy solutions to promote their uptake is essential. A growing strand of the environmental and transport economics literature has focused on the effectiveness of various policies in increasing the market uptake of EVs. However, less attention has been paid to the welfare implications of these policies, as well as to their potential side effects on car ownership and use, and congestion. This session will address the following questions: (i) What are the remaining barriers to large-scale production and adoption of EVs? (ii) How effective have been policies implemented in different countries to promote the uptake of EVs? (iii) What are the potential implications of such policies on welfare, public budgets, car ownership and use, and the environment?

Panelist(s): Rafael Cuesta, Transport for Greater Manchester;
Alexandros Dimitropoulos, OECD;
Joshua Linn, University of Maryland; Resources for the Future;
Walid Oueslati, OECD;
Elisabeth Windisch, International Transport Forum, OECD

POLICY SESSION: THE ROLE OF NON-STATE ACTORS IN CLIMATE POLICY

Room: Room 1.219

Organizer(s): Christiane Reif, ZEW - Leibniz Centre for European Economic Research; Carina Fugger, ZEW - Leibniz Centre for European Economic Research

Chair: Christiane Reif, ZEW - Leibniz Centre for European Economic Research

National laws and regulations introduced by state actors are unlikely to be sufficient to meet the emission targets set in the Paris Climate Agreement, and will have to be supplemented by additional voluntary climate protection activities. Non-state actors include civil society groups, economic actors, and sub-national and local actors, who are heterogeneous and with varying influence. Importantly it remains unassessed whether these actions complement or substitute state actions. The session will start discussing non-state actors from economic, legal, ethical and practical perspectives and then discuss the limits, risks, moral concerns and ability to implement such non-state actions in the European and international context.

Panelist(s): Niels Anger, Centre for European Economic Research (ZEW GmbH);
Mark Atherton, Greater Manchester Combined Authority;
Ibon Galarraga, BC3 Basque Centre for Climate Change;
Goetz Reichert, Centre for European Policy

AGRICULTURE AND BEHAVIOURAL ECONOMICS

Room: Room 4.213

Chair: Prasenjit Banerjee, University of Manchester

The Role of Farmers' Understanding of Nature in Shaping their Uptake of Nature Protection Measures

Barbara Heinrich, Johann Heinrich von Thünen Institute Federal Research Institute for Rural Areas, Forestry and Fisheries; Nataliya Stupak, Johann Heinrich von Thünen Institute Federal Research Institute for Rural Areas, Forestry and Fisheries; Juern Sanders, Thünen Institute

Discussant: Fabian Thomas, University of Osnabrueck

Understanding Farmer Self-Identities and Pro-Environmental Behavior: An Experimental Approach and Cluster Analysis

Fabian Thomas, University of Osnabrueck; Stefanie Engel, University of Osnabrueck

Discussant: Jens Abildtrup, INRA-BETA, Université de Lorraine

Biodiversity protection in private forests: PES schemes, institutions and prosocial behaviour

Jens Abildtrup, INRA-BETA, Université de Lorraine; Anne Stenger, INRA- BETA- University of Strasbourg; Philippe Polomé, GATE; Marieke Blondet, AgroParisTech; Francis De Morogues, FCBA; Claude Michel, PNR des Ballons des Vosges

Discussant: Prasenjit Banerjee, University of Manchester

Not Money, but the Medal: Social Image, Incentive Mechanism, and Biodiversity Protection on Farmland

James Asher; **Prasenjit Banerjee**, University of Manchester; Rupayan Pal, Indira Gandhi Institute of Development Research; Ada Wossink, University of Manchester

Discussant: Barbara Heinrich, Johann Heinrich von Thünen Institute Federal Research Institute for Rural Areas, Forestry and Fisheries

AIR POLLUTION AND HEALTH I

Room: Room 3.204

Chair: Milena Suarez, Insee-CREST

When a (particulate) matter strikes the city. The social disparities in the health costs of air pollution.

Matilde Giaccherini, University of Rome Tor Vergata - CEIS; Joanna Kopinska, University of Rome Tor Vergata - CEIS; Alessandro Palma, Parthenope University of Naples

Discussant: Toshihide Arimura, Faculty of Political Science and Economics Research Institute for Environmental Economics and Management (RIEEM), Waseda University

Subjective probabilistic expectations, Indoor Air Pollution and Health: Evidence from cooking fuel use pattern in India

Toshihide Arimura, Faculty of Political Science and Economics Research Institute for Environmental Economics and Management (RIEEM), Waseda University; Mriduchhanda Chattopadhyay, Waseda University; Hajime Katayama, Waseda University; Mari Sakudo, The Japan Economic Research Institute; Hidefumi Yokoo, National Institute of Environmental Studies

Discussant: Luis Sarmiento, German Institute of Economic Research / TU Berlin

Nitrous Oxides and the Productivity of Cognitive Labor

Luis Sarmiento, German Institute of Economic Research / TU Berlin

Discussant: Milena Suarez, Insee-CREST

Disentangling the causal effects of air pollutants on health: when the numerous characteristics of the planetary boundary layer can help

Milena Suarez, Insee-CREST; Alexandre Godzinski, CREST - French Ministry of Environment

Discussant: Matilde Giaccherini, University of Rome Tor Vergata - CEIS

BIODIVERSITY - DYNAMIC MODELS

Room: Room 4.210

Chair: Encarna Esteban, University of Zaragoza

Protecting rhino populations in South Africa: A bioeconomic evaluation of the trade debate

Kenneth Berger, University of Cape Town; Edwin Muchapondwa, University of Cape Town

Discussant: Simone Borghesi, European University Institute

Don't feed the bears! Environmental defensive expenditures and species-typical behavior in an optimal growth model

Simone Borghesi, European University Institute; Paolo Russu, University of Sassari; Angelo Antoci, University of Sassari

Discussant: Luc Doyen, CNRS

Sustainability standards, multi-criteria maximin and viability

Luc Doyen, CNRS; Pedro Gajardo, usm

Discussant: Encarna Esteban, University of Zaragoza

Ecosystems shifts: implications for groundwater management

Encarna Esteban, University of Zaragoza; Elena Calvo, University of Zaragoza; Jose Albiac, CITA-Government of Aragon

Discussant: Kenneth Berger, University of Cape Town

CHOICE MODELLING I

Room: Room 4.204

Chair: Ioanna Grammatikopoulou, Natural Resources Institute Finland (Luke)

Antecedent Volition and spatial effects: can multiple goal pursuit mitigate distance decay?

Mara Thiene, University of Padova; **Cristiano Franceschinis**, Università degli Studi di Padova; Joffre Swait, FASSA

Discussant: Joachim Schleich, Grenoble Ecole de Management

Conveyance, envy, and home-owners adoption of energy-efficient appliances

Joachim Schleich, Grenoble Ecole de Management; Corinne Faure, Grenoble Ecole de Management; Marie-Charlotte Guetlein, Grenoble Ecole de Management; Gengyang Tu, École Supérieure d'Agricultures, Université Bretagne Loire

Discussant: Djiby Thiam, University of Cape Town

The economics of grey water technology diffusion to mitigate water scarcity in South Africa

Djiby Thiam, University of Cape Town; Herbert Ntuli, University of Cape Town; Edwin Muchapondwa, University of Cape Town; Slim Zekri, Sultan Qaboos University

Discussant: Ioanna Grammatikopoulou, Natural Resources Institute Finland (Luke)

Heterogeneity and attribute non-attendance in preferences for peatland conservation

Ioanna Grammatikopoulou, Natural Resources Institute Finland (Luke); Eija Pouta, Natural Resources Institute Finland (Luke); Janne Artell, Natural Resources Institute Finland (Luke)

Discussant: Cristiano Franceschinis, Università degli Studi di Padova

CLIMATE CHANGE - EXTREME EVENTS

Room: Room 4.211

Chair: Roman Hoffmann, Wittgenstein Centre for Demography and Global Human Capital (IIASA, VID/ÖAW, WU)

Do Natural Disasters Impede Exports? Evidence from Cross-Country Panel Data

Kaori Tembata, Kobe University; **Kenji Takeuchi**, Kobe University

Discussant: Farzana Hossain, University of Melbourne

Creative Destruction or Destructive Creation? Effects of Floods on Firms in India

Farzana Hossain, University of Melbourne

Discussant: Sébastien Marchand, Université Clermont Auvergne, CNRS, CERDI

Impacts of Extreme Climate Events on Technical Efficiency in Vietnamese Agriculture

Sébastien Marchand, Université Clermont Auvergne, CNRS, CERDI; Yoro Diallo, Université Clermont Auvergne, CNRS, CERDI; Etienne Espagne, Agence Française de Développement (AFD)

Discussant: Roman Hoffmann, Wittgenstein Centre for Demography and Global Human Capital (IIASA, VID/ÖAW, WU)

Quantifying the Evidence on Environmental Migration: A Meta-Analysis on Country-Level Studies

Roman Hoffmann, Wittgenstein Centre for Demography and Global Human Capital (IIASA, VID/ÖAW, WU); Anna Dimitrova, International Institute for Applied Systems Analysis (IIASA); Raya Muttarak, University of East Anglia, School of International Development International Institute for Applied Systems Analysis (IIASA); Jesus Crespo-Cuaresma, Vienna University of Economics and Business International Institute for Applied Systems Analysis (IIASA)

Discussant: Kenji Takeuchi, Kobe University

CLIMATE CHANGE AND DEVELOPMENT I

Room: Room 4.205

Chair: Waldemar Marz, Ifo Institute/LMU Munich

Econometric assessment of climate change adaptation in agriculture: from regional averages to the farm level data

Abdul Quddoos, University of Natural Resources and Life Sciences, Vienna; Klaus Salhofer, Institute for Sustainable Economic Development, University of Natural Resources and Life Sciences Vienna; Ulrich B. Morawetz, Institute for Sustainable Economic Development, University of Natural Resources and Life Sciences Vienna

Discussant: Arnaud Goussebaile, ETH Zurich

Altruistic Foreign Aid And Climate Change Mitigation

Arnaud Goussebaile, ETH Zurich; Antoine Bommier, ETH Zurich; Jean-Philippe Nicolai, ETH Zurich; Amélie Goerger, ETH Zurich

Discussant: Elise Grieg, ETH Zürich

Special Interests and Public Opinion in American Environmental Politics

Elise Grieg, ETH Zürich

Discussant: Waldemar Marz, Ifo Institute/LMU Munich

Climate Policy and Inequality in Two-Dimensional Political Competition

Waldemar Marz, Ifo Institute/LMU Munich

Discussant: Abdul Quddoos, University of Natural Resources and Life Sciences, Vienna

EMPIRICAL ANALYSIS OF ELECTRICITY MARKET

Room: Room 3.212

REGULATION

Chair: Victor von Loessl, University of Kassel

California's cap-and-trade program and emission leakage in the electricity sector: an empirical analysis

Chiara Lo Prete, Pennsylvania State University; **Ashish Tyagi**, Frankfurt School of Finance Management; Codr Hohl, Pennsylvania State University

Discussant: Marion Leroutier, Paris School of Economics and CIRED

The Impact of the GB Carbon Price Floor on CO₂e Emissions in the power sector

Marion Leroutier, Paris School of Economics and CIRED

Discussant: Yin Chu, Zhongnan University of Economics and Law

Vertical Separation of Transmission Control and Regional Production Efficiency in the Electricity Industry

Yin Chu, Zhongnan University of Economics and Law

Discussant: Victor von Loessl, University of Kassel

Revenue decoupling and energy consumption: Empirical evidence from the U.S. electric utilities sector

Victor von Loessl, University of Kassel; Heike Wetzel, University of Kassel

Discussant: Ashish Tyagi, Frankfurt School of Finance Management

ENERGY AND CGE MODELLING

Room: Room 4.209

Chair: Xaquín García-Muros, Basque Centre for Climate Change and MIT

Estimating the elasticity of substitution between capital and energy from abatement cost curves: The case of the French industry

Paul Malliet, Sciences Po; Frédéric Reynès, NEO, TNO, OFCE

Discussant: Karl Steininger, University of Graz

Risk Assessment of the Low-Carbon Transition of Austria's Steel and Electricity Sectors

Karl Steininger, University of Graz; Gabriel Bachner, University of Graz; Brigitte Wolkingner, University of Graz; Jakob Mayer, University of Graz; Andreas Türk, University of Graz

Discussant: Philippe Quirion, CIRED / CNRS

Prediction is difficult, even when it's about the past: a hindcast experiment using Res-IRF, an integrated energy-economy model

Philippe Quirion, CIRED / CNRS; Louis-Gaetan Giraudet, Ecole des Ponts ParisTech, CIRED; David Glotin, CIRED; Cyril Bourgeois, CIRED

Discussant: Xaquín García-Muros, Basque Centre for Climate Change and MIT

Who Bears the Burden of Greening Electricity?

Xaquín García-Muros, Basque Centre for Climate Change and MIT; Christoph Böhringer, University of Oldenburg; Mikel Gonzalez-Eguino, Basque Centre for Climate Change (BC3)

Discussant: Paul Malliet, Sciences Po

ENERGY DEMAND AND EFFICIENCY I

Room: Room 2.218

Chair: Ghislaine Lang, University of Neuchatel

Estimating Energy Price Elasticities when Salience is High: Residential Natural Gas Demand in Ukraine

Anna Alberini, University of Maryland; Olha Khymych, Charles University Prague; Milan Scasny, Charles University in Prague

Discussant: Maria Alice Moz Christofolletti, University of Sao Paulo and Food and Agriculture Organization of the United Nations

Who pays the bill? Heterogeneous welfare and emission effects of energy tax policies in Brazil

Maria Alice Moz Christofolletti, University of Sao Paulo and Food and Agriculture Organization of the United Nations

Discussant: Andrea Bigano, CMCC

How are fuel efficient cars priced? Evidence from eight EU countries

Anna Alberini, University of Maryland; Valeria Di Cosmo, Università di Torino; **Andrea Bigano**, CMCC

Discussant: Ghislaine Lang, University of Neuchatel

Energy efficiency and the marginal cost of CO2 abatement: Evidence from a large sample of renter-occupied buildings

Ghislaine Lang, University of Neuchatel; Bruno Lanz, University of Neuchatel

Discussant: Anna Alberini, University of Maryland

POLICY DESIGN - GAME-THEORETICAL MODELLING

Room: Room 3.210

Chair: Takahiko Kiso, University of Aberdeen

Incentives for Green Technology Adoption, Imperfect Compliance, and Risk Aversion

Carmen Arguedas, Universidad Autónoma de Madrid; José Luis Zoffo, Universidad Autónoma de Madrid

Discussant: Jasper Meya, Carl von Ossietzky Universität Oldenburg

Renewable energy policies in federal government systems

Paul Neetzow, Humboldt-Universität Berlin; **Jasper Meya**, Carl von Ossietzky Universität Oldenburg

Discussant: Jenny De Freitas Fernandes, University of the Balearic Islands

Environmental policy instruments and strategic restraint: caps versus taxes

Jenny De Freitas Fernandes, University of the Balearic Islands; Daniel Cardona, Universitat de les Illes Balears; Antoni Rubí-Barceló, Universitat de les Illes Balears

Discussant: Takahiko Kiso, University of Aberdeen

A Subsidy Inversely Related to the Product Price

Takahiko Kiso, University of Aberdeen

Discussant: Carmen Arguedas, Universidad Autónoma de Madrid

SPATIAL ANALYSIS

Room: Room 4.212

Chair: Lutz Philip Hecker, Brandenburg University of Technology Cottbus-Senftenberg

Climate, Disease Development: Malaria Control and Historical Agricultural Productivity in the US

Michele Malpede, Cattolica University and Bicocca University, Milan
Discussant: Menuka Udugama, Wayamba University of Sri Lanka

Implications of improved understanding of animal movement patterns for managing invasive species

Menuka Udugama, Wayamba University of Sri Lanka; Elizabeth Robinson, University of Reading
Discussant: Maria Vrachioli, Technical University of Munich

Water's Contribution to Agricultural Productivity over Space

Maria Vrachioli, Technical University of Munich; Spiro Stefanou, University of Florida
Discussant: Lutz Philip Hecker, Brandenburg University of Technology Cottbus-Senftenberg

Spotlight on spatial environmental policy spillovers: An econometric analysis of wastewater treatment in Mexican municipalities

Lutz Philip Hecker, Brandenburg University of Technology Cottbus-Senftenberg; Frank Wätzold, Brandenburg University of Technology Cottbus-Senftenberg; Gunther Markwardt, Technische Universität Dresden, Faculty of Business and Economics
Discussant: Michele Malpede, Cattolica University and Bicocca University, Milan

STRUCTURAL AND TECHNOLOGICAL CHANGE - EMPIRICAL ANALYSIS

Room: Room 3.211

Chair: Julien Wolfersberger, AgroParisTech INRA UMR Economie Publique Universite Paris-Saclay

Structural Change and the Environment. Unbundling the Contribution of Structural Change to Sustainable Consumption and Production

Giovanni Marin, University of Urbino; Massimiliano Mazzanti, University of Ferrara
Discussant: Finn Ole Semrau, Kiel Institute for the World Economy (IfW)

Stepping up to the mark? Firms' export activity and environmental innovation in 14 European countries

Finn Ole Semrau, Kiel Institute for the World Economy (IfW); Aoife Hanley, Kiel Institute for the World Economy (IfW)
Discussant: Ruijie Tian, University of Gothenburg

Emissions Trading Scheme and Directed Technological Change: Evidence from China

Ruijie Tian, University of Gothenburg
Discussant: Julien Wolfersberger, AgroParisTech INRA UMR Economie Publique Universite Paris-Saclay

Growth and the environment: taking into account structural transformation

Julien Wolfersberger, AgroParisTech INRA UMR Economie Publique Universite Paris-Saclay
Discussant: Giovanni Marin, University of Urbino

URBAN GREEN SPACES

Room: Room 2.219

Chair: Bethany Cooper, University of South Australia

Is bigger always better? An assessment of cultural ecosystem services of urban greenspaces in Hamburg

Leonie Ratzke, University of Hamburg
Discussant: Stefano Pareglio, FEEM-Fondazione Eni Enrico Mattei and Università Cattolica

Changes in green urban spaces' value perception: A meta-analytic benefit transfer function for European cities

Francesca Diluio, FEEM-Fondazione Eni Enrico Mattei; Gianni Guastella, FEEM-Fondazione Eni Enrico Mattei and Università Cattolica; **Stefano Pareglio**, FEEM-Fondazione Eni Enrico Mattei and Università Cattolica
Discussant: Ingmar Schumacher, IPAG Business School

Connectedness to nature, urbanization and the environment

Ingmar Schumacher, IPAG Business School; Emeline Bezin, PSE

Discussant: Bethany Cooper, University of South Australia

Prioritising Investments in Urban Waterways: Insights on the Relative Value of Amenity

Bethany Cooper, University of South Australia; Michael Burton, University of Western Australia; Lin Crase, University of South Australia; Daniel Rigby, University of Manchester

Discussant: Leonie Ratzke, University of Hamburg

VALUATION OF ECOSYSTEM SERVICES I

Room: Room 4.206

Chair: Anders Dugstad, Norwegian University of Life Sciences (NMBU)

Incentivizing Hunters to Support Wildlife Disease Management

Lusi Xie, University of Alberta; Vic Adamovicz, University of Alberta; Patrick Lloyd-Smith, University of Saskatchewan

Discussant: Laetitia Pettinotti, London School of Economics and Political Sciences

Estimating the distributional impacts on local livelihoods of river flow change due to dam building, northern Ghana

Laetitia Pettinotti, London School of Economics and Political Sciences; Marloes Mul, UNESCO-IHE; Anil Markandya, BC3 Basque Centre for Climate Change, University of Bath; James Dalton, IUCN

Discussant: Moritz Drupp, University of Hamburg

Is Ecosystem Resilience an Economic Insurance? Evidence from the Goulburn-Broken Catchment farmland in Australia

Stefan Baumgärtner, University of Freiburg; **Moritz Drupp**, University of Hamburg

Discussant: Anders Dugstad, Norwegian University of Life Sciences (NMBU)

How Reliable are Expert Predictions of Households' Willingness-to-Pay to Preserve the Amazon Rainforest? Comparing Contingent Valuation, Delphi Survey and Benefit Transfer

Anders Dugstad, Norwegian University of Life Sciences (NMBU); Stale Navrud, Norwegian University of Life Sciences

Discussant: Lusi Xie, University of Alberta

WATER POLLUTION

Room: Room 3.205

Chair: Soren Olsen, University of Copenhagen

Spatio-Temporal Design for a Water Quality Monitoring Network Maximizing the Economic Value of Information to optimize the detection of accidental pollution

François Destandau, Laboratoire GESTE, UMR Engees-Irstea MA-8101, Strasbourg, France; **Youssef Zaiter**, Laboratoire GESTE, UMR Engees-Irstea MA-8101, Strasbourg, France

Discussant: Raphael Filippelli, Aarhus University

Mussel farming as a nutrient reduction measure – a case study in Limfjorden, Denmark

Raphael Filippelli, Aarhus University; Mette Termansen, Copenhagen University; Berit Hasler, Aarhus University; Karen Timmermann, Aarhus University

Discussant: Musharaf A. Talpur, Institute for Environmental Studies (IVM), Vrije Universiteit, Amsterdam, The Netherlands

Directional Distance Decay Effects using Multiple Payment Vehicles and Disaggregated Site Quality Attributes in Stated WTP Models

Musharaf A. Talpur, Institute for Environmental Studies (IVM), Vrije Universiteit, Amsterdam, The Netherlands; Roy Brouwer, The Water Institute / University of Waterloo; Mark J. Koetse, Institute for Environmental Studies (IVM) - Vrije Universiteit Amsterdam

Discussant: Soren Olsen, University of Copenhagen

The impacts of three dimensions of (dis)similarities on water quality benefit transfer errors

Johannes Carolus, University of Copenhagen; Jette Bredahl Jacobsen, University of Copenhagen; **Soren Olsen**, University of Copenhagen

Discussant: Youssef Zaiter, Laboratoire GESTE, UMR Engees-Irstea MA-8101, Strasbourg, France

Coffee break

Thursday, 10.15-10.45

Opening ceremony

Thursday, 10.45-11.15

- **Welcome address by Ada Wossink**, Chair of LOC Room: Lecture Theatre B
- **Welcome address by Dame Nancy Rothwell**, President and Vice-Chancellor of the University of Manchester (introduction by Alistair Ulph)
- **Welcome address by Carlo Carraro**, President of EAERE

Plenary session 1

Thursday, 11.15-12.15

DAVID PEARCE LECTURE: TOWARDS AN OPTIMAL(?) DESIGN OF FOREST CONSERVATION INTERVENTIONS IN DEVELOPING COUNTRIES - EVIDENCE FROM THE FIELD" - DAAN VAN SOEST, TILBURG UNIVERSITY

Room: Lecture Theatre B

Chair: Ada Wossink, University of Manchester

EGG-TIMERS: AIR POLLUTION AND CLIMATE CHANGE

Room: Room 1.218

Chair: Mette Termansen, Copenhagen University

Abatement of ammonia emissions from livestock housing fine-tuned according to impact on protected habitat

David De Pue, Ghent University; **Andreas Bral**, Ghent University; Jeroen Buysse, Ghent University

Tradable Permits and Efficiency under Eco-Dumping

Fabio Antoniou, University of Ioannina; Panos Hatzipanayotou, Athens University of Economics and Business; Nikos Tsakiris, University of Ioannina

Motives of firms for the purchase of carbon offset certification: Evidence from a field experiment

Carina Fugger, ZEW - Leibniz Centre for European Economic Research; Kathrine von Graevenitz, ZEW - Leibniz Centre for European Economic Research; Martin Kesternich, ZEW - Leibniz Centre for European Economic Research

EGG-TIMERS: ELECTRICITY MARKET I

Room: Room 2.218

Chair: Karl Steininger, University of Graz

Power Markets in Transition: Decarbonization, Energy Efficiency, and Short-Term Demand Response

Christoph Weissbart, ifo Institute; **Mier Mathias**, ifo Institute

There is no economic case for new coal plants in India

Shoibal Chakravarty, Ashoka Trust for Research in Ecology and the Environment; E. Somanathan, Indian Statistical Institute

Committed But for How Long? On the Optimal Obligation Periods in Capacity Markets

Sylwia Bialek, New York University; Burcin Unel, Institute for Policy Integrity, New York University

EGG-TIMERS: ENVIRONMENT AND BEHAVIOURAL ECONOMICS

Room: Room 2.220

Chair: Prasenjit Banerjee, University of Manchester

Does the observability of monitoring promote or hinder cooperation? Experimental evidence from sequential prisoners' dilemma games

Johannes Lohse, University of Birmingham; Michalis Drouvelis, University of Birmingham; Johannes Jarke, University of Hamburg

Energy Conservation "Nudges": Evidence from a Randomized Residential Field Experiment in the Philippines

Majah-Leah Ravago, Ateneo de Manila University; Arlan Brucal, London School of Economics and Political Science (LSE); Nori Tarui, Dep. of Economics, University of Hawaii; Toshi Arimura, Waseda University

The impact of communicating immediate emotions on the private provision of public goods: Field experimental evidence from the market of green crowdfunding

Anja Köbrich, University of Kassel; Janosch Schobin, University of Kassel

EGG-TIMERS: NATURAL RESOURCE MODELLING

Room: Room 2.219

Chair: Michael Finus, University of Graz

Agglomeration and the Environment

Andri Brenner, University of Potsdam, Berlin Brandenburg, MCC Berlin

A Multi-Sector Multi-Region Macroeconomic Model for Germany -- An Application to the Coal Phase-Out in Germany

Christoph Schult, Halle Institute for Economic Research; Oliver Holtemoeller, Halle Institute of

Economic Research; Katja Heinisch, Halle Institute for Economic Research

National resource risks in a globalised world

Oliver Taherzadeh, University of Cambridge

EGG-TIMERS: TRADE AND ENVIRONMENT

Room: Room 3.204

Chair: Edward Manderson, University of Manchester, UK

ENVIRONMENTAL REGULATION AND EXPORT PERFORMANCE: EVIDENCE FROM THE U.S.

Zinnia Mukherjee, Simmons University; Niloufer Sohrabji, Simmons University

Environmental Provisions in Trade Agreements: Protectionism in Disguise?

Elisa Rottner, Centre for European Economic Research; Miriam Frey, University of Bayreuth; Joschka Wanner, University of Bayreuth

Non-Compliance with Environmental Product Standards in an International Duopoly

Laura Birg, University of Göttingen; **Jan Voßwinkel**, Nürtingen Geislingen University

EGG-TIMERS: VALUATION I

Room: Room 1.219

Chair: Michael Burton, University of Western Australia

Modeling household fuel choice and use: A multiple discrete-continuous choice framework

Aemiro Melkamu Daniel, Center for Environmental and Resource Economics, Umeå University

More in good condition or less in bad condition? Valence-based framing effects in the valuation of ecosystems' restoration

Michela Faccioli, University of Exeter; Klaus Glenk, Scotland's Rural College; Christoph Schulze, Leibniz Centre for Agricultural Landscape Research (ZALF)

Consequentiality, Elicitation Formats, and the Willingness-To-Pay for Green Electricity: Evidence from Germany

Marco Horvath, RWI - Leibniz Institute for Economic Research; Manuel Frondel, Reinisch-Westfaelisches Institut fuer Wirtschaftsforschung; Mark Andor, RWI - Leibniz Institute for Economic Research

POSTER SESSION 1

Room: Drum Area, G/F

[1-1] Adoption of mitigation practices in agriculture: an application of the option value theory

Camille Tevenart, INRA, France - Climate Economic Chair, France; Marc Baudry, University Paris 10, Climate economics chair; Edouard Civel, University Paris 10, Climate economics chair, Saint-Gobain research

[1-2] Benefit-cost analyses of alternative Riparian Buffer Strip management scenarios in Denmark - will allowing for more flexible and targeted buffer strips be beneficial?

Soren Olsen, University of Copenhagen; Kennet Uggeldahl, University of Copenhagen

[1-3] Designing an EU Ship Recycling Licence: A Roadmap

Jean-Philippe Nicolai, ETH Zurich; Caroline Devaux, University of Nantes, Maritime and Oceanic Law Cent

[1-4] Economic and Environmental Impacts of Raising Revenues for Climate Finance from Public Sources

Jan Schneider, ETH Zürich; Christoph Böhringer, University of Oldenburg; Marco Springmann, University of Oxford

[1-5] Energy-related financial literacy and bounded rationality in appliance replacement attitudes: Evidence from Nepal

Massimo Filippini, ETH Zurich, Centre for Energy Policy and Economics (CEPE); **Nilkanth Kumar**, ETH Zurich; Suchita Srinivasan, ETH Zurich

[1-6] How reliable are empirical studies on economic preferences with student samples? An analysis on the basis of large-scale data

Amantia Simixhiu, University of Kassel; **Andreas Ziegler**, University of Kassel

[1-7] Managing a Spatial Externality of RES Development: Uniformity vs. Differentiated Regulation

Charlotte Geiger, Leipzig University; **Paul Lehmann**, Leipzig University

[1-8] On the relationship between consumption and CO2 emissions: the case of Portugal

José Belbute, University of Évora

[1-9] Photovoltaic self-consumption is now profitable in Spain: effects of the new regulation on prosumers' internal rate of return

Javier López Prol, Uni. Graz; **Karl Steininger**, University of Graz

[1-10] Policy congruence on nuclear power between citizens and policy makers

Piia Remes, VATT Institute for Economic Research; **Anni Huhtala**, VATT Institute for Economic Research

[1-11] Time Rebound Effect in Households' Energy Use: Theory and Evidence

Kenichi Mizobuchi, Matsuyama University; **Hiroaki Yamagami**, Faculty of Economics, Seikei University

Lunch

Thursday, 12.45-14.00

-
- * EAERE Country Reps Meeting – Room 2.217
 - * EAERE-POC Meeting – Room 3.213
 - * Journal Board Meeting REE – Room 4.214 (12:15 – 14:00)

* - by invitation only

PARALLEL SESSION 2
THU 14:00-15:45

THEMATIC SESSION: CARBON MARKETS AND COMPETITIVENESS

Room: Room 1.219

Organizer(s): Raphael Calel, Georgetown University

Chair: Raphael Calel, Georgetown University

Will large-scale carbon market regulations ultimately hurt or help domestic industries? This question has been subject to heated debate preceding every attempt to design and implement carbon markets, but rigorous and comprehensive empirical evidence has long been sorely lacking. This session will bring together three new papers from around the world that jointly represent state-of-the-art empirical research aimed at answering this question, respectively examining the effects of the EU's Emissions Trading System, of China's seven pilot trading programs, and California's AB-32 program.

China's ETS Improves Firms' CompetitivenessJingbo Cui, Wuhan University; Junjie Zhang, Duke University; **Yang Zheng**, London School of Economics and Political Science**Profit or Perish? Room: Room 2.220

Organizer(s): Berit Hasler, Aarhus University; Mette Termansen, Copenhagen University

Chair: Berit Hasler, Aarhus University

Nitrogen runoff from agriculture is widely recognised to cause significant adverse impacts on water quality in freshwater and marine systems. Large heterogeneities in costs of abatement across polluters present opportunities for implementing economic instruments for water quality management. One such instrument is a water quality trading scheme, which has been proposed as a cost-effective policy mechanism with reliable target achievement. However, despite these efficiency gains promised by water quality trading, few schemes have been implemented in practice and even fewer successes have been reported. This session will discuss the current understanding of the economic potential of trading schemes for improving water quality, consider the obstacles which typically prevent that potential from being realized, and illustrate the application of different modelling approaches for evaluating potential solutions to these problems. The different modelling approaches include a "smart market" approach, a contingent behavior approach, and an analysis of stakeholders' perceptions of trading highlighting potential explanations for the lack of trading schemes in this policy area. The session contributes to the discussion of both potentials and barriers of trading as an instrument to regulate agricultural non-point pollution.

POLICY SESSION: ECONOMICS OF THE SUSTAINABLE DEVELOPMENT GOALS

Room: Lecture Theatre A

Organizer(s): Edward B. Barbier, Colorado State University, EAERE Country Representative

Chair: Edward B. Barbier, Colorado State University, EAERE Country Representative

In 2015, the General Assembly of the United Nations (UN) formally adopted the Sustainable Development Goals as its 2030 agenda for sustainable development (UN 2015). There are 17 SDGs, which currently comprise 169 targets and 230 indicators. Since the SDGs aim to achieve a combination of economic development, environmental sustainability, and social inclusion they must embrace a wide range of targets and indicators. It has also been stressed that the interlinkages and integrated nature of the SDGs are critical to attaining sustainable development (UN 2018). To date, very few assessments of the SDGs have occurred in environmental and resource economics. The purpose of this session is to bring together three papers that explore economic approaches to assessing progress in attaining these SDGs, through the application of concepts and methods in environmental and resource economics, and thereby show how environmental and resource economics can inform and improve assessment of progress in attaining the 17 Sustainable Development Goals.

Panelist(s): Anil Markandya, BC3 Basque Centre for Climate Change, University of Bath;
Julie Rozenberg, World Bank;
Edward B. Barbier, Colorado State University, EAERE Country Representative;
Michael Hanemann, Arizona State University;
Joanne Burgess, Colorado State University

The Role of Natural Capital in Meeting the SDGs

Anil Markandya, BC3 Basque Centre for Climate Change, University of Bath

Beyond the Gap: How countries can afford the infrastructure-related SDGs while protecting the planet

Julie Rozenberg, World Bank; Marianne Fay, World Bank

Sustainable Development Goal Indicators: Analyzing Trade-offs and Complementarities

Edward B. Barbier, Colorado State University, EAERE Country Representative; Joanne Burgess, Colorado State University

POLICY SESSION: THE EUROPEAN COMMISSION'S LONG-TERM STRATEGY FOR A CLIMATE-NEUTRAL EUROPE BY 2050

Room: Room 1.218

Organizer(s): Thomas Stoerk, European Commission; LSE

Chair: Thomas Stoerk, European Commission; LSE

In November 2018 the European Commission announced its long-term strategy for a climate neutral Europe by 2050, based on detailed modelling of pathways to support its strategy to achieve net-zero climate emissions by 2050 compatible with the goal of limiting global warming to +1.5°C. This session will present the in-depth analysis supporting this strategy and discuss climate policies to achieve this strategy and how they relate to EU institutions.

Panelist(s): Pantelis Capros, National Technical University of Athens;
Frank Convery, University College Dublin and Envecon;
Michel den Elzen, PBL Netherlands Environmental Assessment Agency;
Simon Dietz, LSE

CHOICE MODELLING - METHODOLOGICAL ADVANCES

Room: Room 4.204

Chair: Michael Burton, University of Western Australia

Assessing willingness to pay estimates in misspecified mixed logit models

Daniel Engler, University of Kassel; Andreas Ziegler, University of Kassel

Discussant: Wiktor Budziński, University of Warsaw

Misspecification of preference heterogeneity structure in hybrid choice models

Wiktor Budziński, University of Warsaw

Discussant: Johane Dikgang, University of Johannesburg

The link between response time and choices in choice experiments

Johane Dikgang, University of Johannesburg; Genius Murwirapachena, Durban University of Technology

Discussant: Michael Burton, University of Western Australia

Model in-variance when estimating random parameters with categorical variables

Michael Burton, University of Western Australia

Discussant: Daniel Engler, University of Kassel

CLIMATE CHANGE AND LABOUR MARKET EFFECTS

Room: Room 4.213

Chair: Jules Schers, Energy Research Centre, University of Cape Town (South Africa); CIRED, Nogent-sur-Marne (France)

Labour supply in a warmer world: the impact of climate change on the global workforce

James Rising, London School of Economics; Rachel Baker, Princeton University; Tamma Carleton, University of Chicago; Anthony D'Agostino, Mathematica Policy Research; Michael Delgado, Rhodium Group; Timothy Foreman, Columbia University; Michael Greenstone, University of Chicago; Trevor Houser, Rhodium Group; Solomon Hsiang, University of California, Berkeley; Andy Hultgren, University of California, Berkeley; Amir Jina, University of Chicago; Robert Kopp, Rutgers University; Kelly McCusker, Rhodium Group; Ishan Nash, University of Chicago; Matthew Pecenco, University of California, Berkeley; Ashwin Rode, University of Chicago; Justin Simcock, Rhodium Group; Jiacan Yuan, Rutgers University

Discussant: Francesco Vona, OFCE Sciences-Po

Climate Policies and Skill-Biased Employment Dynamics: evidence from EU countries

Francesco Vona, OFCE Sciences-Po; Giovanni Marin, University of Urbino

Discussant: Chi Man Yip, University of Calgary

Labor Market Dynamics in Slumps: What, So What, and Now What?

Chi Man Yip, University of Calgary

Discussant: Jules Schers, Energy Research Centre, University of Cape Town (South Africa); CIRED, Nogent-sur-Marne (France)

The impact of carbon tax revenue recycling on GDP and employment in South Africa

Jules Schers, Energy Research Centre, University of Cape Town (South Africa); CIRED, Nogent-sur-Marne (France); Frédéric Gherzi, CIRED (AgroParisTech, CIRAD, CNRS, EHESS, Ecole des Ponts ParisTech, Université Paris-Saclay); Franck Lecocq, CIRED (AgroParisTech, CIRAD, CNRS, EHESS, Ecole des Ponts ParisTech, Université Paris-Saclay)

Discussant: James Rising, London School of Economics

CLIMATE RISKS AND STRANDED ASSETS

Room: Room 4.209

Chair: Frederick van der Ploeg, Dep. of Economics, University of Oxford

Disaster risks, disaster strikes, and economic growth: the role of preferences

Thomas Douenne, Paris School of Economics

Discussant: Veronika Stolbova, ETH Zurich

Climate policy risks of the Euro Area: financial system and real economy

Veronika Stolbova, ETH Zurich

Discussant: Anna Stünzi, ETH Zurich

The potential of clear policy announcements to reduce the risk of stranded assets for individuals

Anna Stünzi, ETH Zurich

Discussant: Frederick van der Ploeg, Dep. of Economics, University of Oxford

Race to burn the last ton of carbon and the risk of stranded assets

Frederick van der Ploeg, Dep. of Economics, University of Oxford

Discussant: Thomas Douenne, Paris School of Economics

DISCOUNTING I

Room: Room 4.205

Chair: Christian Gollier, Toulouse School of Economics

Discounting, inclusive wealth and sustainability

Rintaro Yamaguchi, National Institute for Environmental Studies

Discussant: Maria Arvaniti, ETH Zurich

Resource Management, Present Bias and Regime Shifts

Chandrakiran Krishnamurthy, Swedish University of Agricultural Economics (SLU); **Maria Arvaniti**, ETH Zurich; Anne-Sophie Crepin, Beijer Institute of Ecological Economics, Stockholm

Discussant: Christian Gollier, Toulouse School of Economics

On the efficient growth rate of carbon price under a carbon budget

Christian Gollier, Toulouse School of Economics

Discussant: Rintaro Yamaguchi, National Institute for Environmental Studies

EMPIRICAL ANALYSIS OF FORESTRY I

Room: Room 4.210

Chair: Derya Keles, Université de Lorraine, Université de Strasbourg, AgroParisTech, CNRS, INRA, BETA

The impact of quality and quantity of urban green spaces on the level of life satisfaction: a case of Tokyo metropolitan area

Ippei Aoshima, Kobe University; **Masayuki Sato**, Kobe University

Discussant: Luiza Martins Karpavicius, University of São Paulo

Discussant: Anca Claudia Balietti, University of Heidelberg

Coffee break

Thursday, 15.45-16.15

PARALLEL SESSION 3
THU 16:15-18:00

THEMATIC SESSION: RESIDENTIAL ENERGY EFFICIENCY: EVALUATION OF POLICY INSTRUMENTS

Room: Room 1.219

Organizer(s): Andreas Gerster, University of Mannheim

Chair: Andreas Gerster, University of Mannheim

The low tendency of consumers to invest in seemingly cost-effective energy efficiency technologies, commonly referred to as the “energy efficiency gap” has long been a puzzle in environmental economics. A plethora of factors have been proposed to explain that gap, ranging from market failures through information asymmetries and split incentives to bounded rationality of consumers. By exacerbating problems of environmental pollution and climate change, the energy efficiency gap has motivated the implementation of an array of policies throughout Europe. Such policies typically employ price instruments, such as energy taxes and investment subsidies, or information instruments, such as consumption feedback. While price instruments are favourable from an efficiency perspective, their distributional implications can stir massive protests, as the current “gilets jaunes” protests in France demonstrate. By contrast, information instruments promise to gently “nudge” consumers towards more sustainable behaviours and investments and have become particularly relevant as digitalization progresses. Yet, the required infrastructure, such as smart meters, is costly and consumers are reluctant to pay for it, partly because evidence on potential savings is scarce. This thematic session will present complementary ways of evaluating energy efficiency policies in the residential sector: field experiments, quasi-experimental approaches, and integrated energy-economy modelling. The contributions share a common perspective and offer evidence on the effectiveness of central energy efficiency policies in France, Germany, and the U.S.

Long-term efficiency and distributional impacts of energy saving policies in the French residential sector

Louis-Gaetan Giraudet, Ecole des Ponts ParisTech, CIREN; Cyril Bourgeois, CIREN; Philippe Quirion, CIREN / CNRS

THEMATIC SESSION: THE ECONOMICS IMPACTS OF AIR POLLUTION IN CHINA

Room: Lecture Theatre A

Organizer(s): Min Wang, Peking University

Chair: Shuai Chen, Zhejiang University

The papers in this thematic session focus on the impacts of air pollution (or climate change) on health and population migration in China. They are all impact analysis papers and jointly provide a picture of the costs of the severe air pollution in China, but are of relevance to pollution problems in developing countries more generally. The papers examine a number of impacts of air pollution. First the session studies contemporaneous and medium-run effects of air pollution on morbidity and medical expenditure. Second, the session also considers temperature effects on mortality and the attempts to mitigate such effects through heating and air conditioning, showing important differences between urban and rural populations. Third the session analyses the extent to which people try to avoid air pollution by travelling between cities.

Flights to safety: Evidence of Chinese residents fleeing air pollution via air travels

Shuai Chen, Zhejiang University; Yuyu Chen, Peking University; Ziteng Lei, University of California-Santa Barbara; Jie-Sheng Tan-Soo, National University of Singapore

Temperature Effects on Mortality and Household Adaptation: Evidence from China
Xiumei Yu, Peking University; Xiaoyan Lei, Peking University; Min Wang, Peking University

The Impact of Air Pollution on Morbidity and Medical Expenditure: Analysis Based on Records of Basic Medical Insurance of Beijing

Fan Xia, National School of Development, Peking University; Jianwei Xing, National School of Development, Peking University; Jintao Xu, National School of Development, Peking University; Xiaochuan Pan, School of Public Health, Peking University

POLICY SESSION: THE ROLE OF NATURAL CAPITAL ACCOUNTING IN INFORMING POLICY-MAKING AND ENVIRONMENTAL GOVERNANCE

Room: Room 2.220

Organizer(s): Silvia Ferrini, Department of Political Science and International, University of Siena and Centre for Social and Economic Research on the Global Environment, University of East Anglia; Marije Schaafsma, University of Southampton; Gaetano Grilli, CEFAS
Chair: Marije Schaafsma, University of Southampton

Natural Capital Accounting (NCA) frameworks aim to integrate the contribution of environmental non-market goods and services to national wealth in standard National Accounts. Different accounting methods are developing rapidly, with significant contributions from environmental and resource economics, but there are no internationally agreed upon methods. The System of Environmental-Economic Accounting (SEEA) has emerged as a leading tool, and is undergoing revision to reconcile the different priorities and economic accounting system of different countries. However there are significant challenges: conceptual differences, practical problems for standardising data, differences between national needs and needs at local level or applications outside the public sector, and misleading interpretations of NCA results. This session will reflect on progress made so far, hurdles still to be overcome and the potential contribution of environmental and resource economists.

Panelist(s): Martin Lok, Natural Capital Coalition;
Alessandra La Notte, European Commission Joint Research Centre;
Tim Sunderland, Natural England, UK Government;
Kerry Turner, University of East Anglia

POLICY SESSION: THE ROLE OF TECHNOLOGIES IN MEETING CLIMATE TARGETS

Room: Room 1.218

Organizer(s): Elena Verdolini, RFF-CMCC European Institute on Economics and the Environment
Chair: Yeong Jae Kim, RFF-CMCC European Institute on Economics and the Environment

The aim of this policy session is to promote debate and exchange of ideas about the crucial role that technology innovation, development and diffusion play with respect to the achievement of climate targets. Innovation and diffusion of low carbon technologies has increased the penetration of solar, wind and hydro power by a factor of 3.5 between 1980 and 2017. Yet the distribution of renewable energy technologies is very different across countries and across many energy-intensive and hard-to-decarbonise sectors. To tackle this will require policy makers to consider important bottlenecks as well enabling factors which characterise low-carbon technologies, and this will be the focus of this policy session.

Panelist(s): Roger Cooke, Resources for the Future and the University of Strathclyde;
Carolyn Fischer, Resources for the Future;
Thomas Sterner, University of Gothenburg;
Yeong Jae Kim, RFF-CMCC European Institute on Economics and the Environment

CLIMATE CHANGE AND ADAPTATION IN AGRICULTURE

Room: Room 4.213

Chair: Manuela Coromaldi, University of Rome "Niccolò Cusano"

Climate Change and Adaptation in Agriculture: Evidence from US Cropping Patterns

Xiaomeng Cui, Jinan University

Discussant: Alistair Munro, National Graduate Institute for Policy Studies

Getting warmer? Getting colder: using experimental evidence from a Kenyan panel to test for the reliability of reported perceptions of climate change and adaptation.

Alistair Munro, National Graduate Institute for Policy Studies
Discussant: Ajaz Ahmed, Durham University Business School

Farm Household Weather Change Perceptions and Flood Adaptations in the Northern Pakistan

Ajaz Ahmed, Durham University Business School; Ashar Aftab, Durham University Business School
Discussant: Manuela Coromaldi, University of Rome "Niccolò Cusano"

ENVIRONMENT AND BEHAVIOURAL ECONOMICS I

Room: Room 4.204

Chair: Katharina Momsen, University of Innsbruck

Reducing Air Pollution through Behavioral Change of Wood-Stove Users: Evidence from an RCT in Valdivia, Chile

Cristobal Ruiz-Tagle, Environmental Defense Fund; Alejandra Schueftan, Instituto Nacional Forestal

Discussant: Maria Naranjo, Wageningen University & Research (WUR)

Testing conditional cooperation: Local participation of farmers in agricultural cooperatives

Maria Naranjo, Wageningen University & Research (WUR); Peter Martinsson, University of Gothenburg; Francisco Alpizar, Tropical Agricultural Research and Higher Education Center (CATIE)

Discussant: Astrid Dannenberg, University of Kassel

Status for the Good Guys: A Natural Field Experiment on Climate Charity

Astrid Dannenberg, University of Kassel; Olof Johansson Stenman, University of Gothenburg; Heike Wetzell, University of Kassel

Discussant: Katharina Momsen, University of Innsbruck

When do people exploit moral wiggle room? - An experimental analysis in a market setup

Katharina Momsen, University of Innsbruck; Markus Ohndorf, University of Innsbruck

Discussant: Cristobal Ruiz-Tagle, Environmental Defense Fund

HUMAN CAPITAL AND CLIMATE CHANGE

Room: Room 4.205

Chair: Nicole Wagner, German Institute for Economic Research (DIW Berlin)

Has the Weather Got You Down? The Impact of Temperature on Mental Health

Susana Ferreira, The University of Georgia; Mengyao Li, The University of Georgia; Travis Smith, The University of Georgia

Discussant: Yun Qiu, Jinan University

Too hot to focus: The mean and distributional effects of heat on labor productivity

Yun Qiu, Jinan University; Jinhua Zhao, Michigan State University

Discussant: Nikolai Cook, University of Ottawa

Brain Freeze: How Cold Affected Performance on Over a Million Exams

Nikolai Cook, University of Ottawa; Anthony Heyes, University of Ottawa

Discussant: Nicole Wagner, German Institute for Economic Research (DIW Berlin)

Fracking and Health-Related Absenteeism of Employees

Nicole Wagner, German Institute for Economic Research (DIW Berlin); Luis Sarmiento, German Institute of Economic Research / TU Berlin

Discussant: Susana Ferreira, The University of Georgia

MACROECONOMIC MODELLING OF CLIMATE CHANGE

Room: Room 4.209

Chair: Felix Meier, German Centre for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig

Modelling the Green Knowledge Production Function with Fiscal Shocks by a Latent Group Structures for OECD countries

Saptorshee Chakraborty, University of Ferrara; **Massimiliano Mazzanti**, University of Ferrara

Discussant: Pim Heijnen, University of Groningen

Reversible environmental catastrophes with disconnected generations

Pim Heijnen, University of Groningen; Ben Heijdra, University of Groningen

Discussant: Mouez Fodha, University Paris 1 Pantheon-Sorbonne

Pollution in a globalized world: Is the decrease of debt in developing countries a solution?

Mouez Fodha, University Paris 1 Pantheon-Sorbonne; Marion Davin, CEE-M, Univ Montpellier, CNRS, INRA, SupAgro (Montpellier, France); Thomas Seegmuller, Aix-Marseille School of Economics, AMSE

Discussant: Felix Meier, German Centre for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig

Solar Geoengineering in a Regionalized Climate Economy

Felix Meier, German Centre for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig; Christian Traeger, University of Oslo

Discussant: Massimiliano Mazzanti, University of Ferrara

OPTIMAL POLICY

Room: Room 3.210

Chair: Eduardo Souza-Rodrigues, University of Toronto

OPTIMAL POLLUTION TAXATION, INCOME REDISTRIBUTION, AND THE NEED FOR EDUCATION SUBSIDIES

Diane Aubert, ETH Zurich; Frederick van der Ploeg, Dep. of Economics, University of Oxford

Discussant: Henriët Fanny, PSE

On the Socially Optimal Nitrogen and Phosphorus Management in Spring Crop Cultivation

Matti Sihvonen, University of Helsinki; Elena Valkama, LUKE; Kari Hyytiäinen, University of Helsinki

Discussant: Diane Aubert, ETH Zurich

The principle of targeting in the presence of local externalities

Henriët Fanny, PSE; Stéphane Gauthier, PSE - univ Paris1

Discussant: Eduardo Souza-Rodrigues, University of Toronto

Optimal Environmental Targeting in the Amazon Rainforest

Eduardo Souza-Rodrigues, University of Toronto; Robert McMillan, University of Toronto; Juliano Assuncao, PUC-Rio and CPI; Joshua Murphy, Natural Resources Canada

Discussant: Matti Sihvonen, University of Helsinki

SOLAR AND BIOENERGY

Room: Room 4.210

Chair: Ruth Delzeit, Kiel Institute for the World Economy

Solar Initiatives in the Sunshine State

Ritika Khurana, West Virginia University; Levan Elbakidze, Associate Professor, WVU; Joshua Hall, west virginia university

Discussant: Stefan Pollinger, Toulouse School of Economics

The Kinks Know More on a Sunny Afternoon: A Solar Energy Policy Evaluation Beyond Bunching

Stefan Pollinger, Toulouse School of Economics

Discussant: Hongbo Duan, University of Chinese Academy of Sciences

Multi-renewable management: interactions between wind and solar within uncertain technology ecological system

Hongbo Duan, University of Chinese Academy of Sciences

Discussant: Ruth Delzeit, Kiel Institute for the World Economy

Scenarios for an impact assessment of bioeconomy strategies: results from a co-design process

Ruth Delzeit, Kiel Institute for the World Economy; Tobias Heimann, Kiel Institute for the World Economy; Franziska Schuenemann, Kiel Institute for the World Economy; Mareike Söder, Kiel Institute for the World Economy; Florian Zabel, Ludwig-Maximilian University

Discussant: Ritika Khurana, West Virginia University

SUSTAINABLE CONSUMPTION

Room: Room 3.211

Chair: Edwin van der Werf, Wageningen University

How to stimulate environmentally friendly consumption: Evidence from a nationwide social experiment to promote eco-friendly coffee

Ryo Takahashi, Waseda University

Discussant: Ipek Eraydin, University of Kassel

The effect of social information and financial incentives on preferences for reusable coffee cups

Claudia Schwirplies, University of Hamburg; **Ipek Eraydin**, University of Kassel

Discussant: Edwin van der Werf, Wageningen University

Adopters vs Non-Adopters of the Green Key Ecolabel in the Dutch Accommodation Sector

Edwin van der Werf, Wageningen University; Eelco Buunk, KplusV

Discussant: Ryo Takahashi, Waseda University

TRADE AND ENVIRONMENT II

Room: Room 4.212

Chair: Mengdi Liu, Nanjing University

Firms' Performance in a Natural Resource Based Economy: Evidence from Canadian Plants

Wessel Vermeulen, Newcastle University; Saeed Moshiri, STM College, University of Saskatchewan; Gry Østenstad, University of South-Eastern Norway

Discussant: Jingbo Cui, Wuhan University

Does Environmental Regulation Affect Firm Exports? Evidence from Wastewater Discharge Standard in China

Jingbo Cui, Wuhan University; Yan Zhang, Central University of Finance and Economics; Chenghao Lu, Central University of Finance and Economics

Discussant: Victor Dornelas, University of São Paulo

China shock: environmental impacts in Brazil

Victor Dornelas, University of São Paulo; Ariaster Baumgratz Chimeli, University of São Paulo

Discussant: Mengdi Liu, Nanjing University

Trade Liberalization, Technology Upgrading, and Environmental Outcomes: Evidence from China's Accession to the WTO

Mengdi Liu, Nanjing University; Bing Zhang, Nanjing University

Discussant: Wessel Vermeulen, Newcastle University

WASTE I

Room: Room 3.204

Chair: Alessio D'Amato, University of Rome Tor Vergata and SEEDS

On optimal nuclear waste disposal

Pauli Lappi, Ca' Foscari University of Venice; Jussi Lintunen, Natural Resources Institute Finland (Luke)

Discussant: Prudence Dato, IREGE/Université Savoie Mont Blanc

Optimal Municipal Solid Waste Taxation with Waste Picking

Amandine Gnonlonfin, University of Nice; **Prudence Dato**, IREGE/Université Savoie Mont Blanc

Discussant: Gala Sipos, University of Bern: Department of Economics and Oeschger Center for Climate Change Research

A consumer theory of rational food waste

Gala Sipos, University of Bern: Department of Economics and Oeschger Center for Climate Change Research; Ralph Winkler, University of Bern: Department of Economics and Oeschger Center for Climate Change Research

Discussant: Alessio D'Amato, University of Rome Tor Vergata and SEEDS

From Corruption to Illegal Waste Disposal: an Evaluation of the Role Played by Waste Management (In)efficiency

Alessio D'Amato, University of Rome Tor Vergata and SEEDS; Gionata Castaldi, Italian Ministry of Environment, TA Sogesid; Mariangela Zoli, University of Rome Tor Vergata and SEEDS

Discussant: Pauli Lappi, Ca' Foscari University of Venice

WATER RESOURCES - CHOICE MODELLING

Room: Room 3.205

Chair: Tobias Häggmark Svensson, Swedish University of Agricultural Sciences

Choice uncertainty and preference learning in discrete choice experiments

Markus Glatt, Eawag; Logar Ivana, Eawag; Roy Brouwer, The Water Institute / University of Waterloo

Discussant: Kennet Uggeldahl, University of Copenhagen

Watch, Listen and Learn: Using narrated videos to provide information in stated choice experiments

Kennet Uggeldahl, University of Copenhagen; Anne Kejser Jensen, Energinet; Soren Olsen, University of Copenhagen

Discussant: Ewa Zawojska, University of Warsaw

Benefit Transfer and Commodity Measurement Scales: Consequences for Validity and Reliability

Robert Johnston, Clark University; **Ewa Zawojska**, University of Warsaw

Discussant: Tobias Häggmark Svensson, Swedish University of Agricultural Sciences

Farmers' participation in AES, willingness-to-accept and the impact of spatial variables

Tobias Häggmark Svensson, Swedish University of Agricultural Sciences

Discussant: Markus Glatt, Eawag

Social event

Thursday, 18.30-20.30

PARALLEL SESSION 4
FRI 8:30-10:15

Parallel session 4

Friday, 08.30-10.15

THEMATIC SESSION: IMPACTS OF CLIMATE SHOCKS IN DEVELOPING COUNTRIES

Room: Room 2.220

Organizer(s): Philippe Delacote, Université de Lorraine, AgroParisTech-INRA, Bureau d'Economie Théorique et Appliqué (BETA); Anna Creti, Paris Dauphine University

Chair: Philippe Delacote, Université de Lorraine, AgroParisTech-INRA, Bureau d'Economie Théorique et Appliqué (BETA)

Climate shocks have strong effects in developing countries' economies both on agriculture and other sectors. Climate change is expected to increase the occurrence of such shocks, raising the question of their impacts on economic performance and livelihoods, as well as adaptation strategies. This session aims to provide a better understanding of the economic impacts of climate shocks in developing as well as investigating options to cope with climate change. Case studies from India and Sub-Saharan Africa will be considered. The focus will be not only on agricultural sectors and land use but also on manufacturing and education.

The Impact of Temperature on Productivity and Labor Supply: Evidence from Indian Manufacturing

E. Somanathan, Indian Statistical Institute; Anant Sudarshan, University of Chicago; Rohini Somanathan, Delhi School of Economics; Meenu Tewari, University of North Carolina, Chapel Hill

Coping mechanisms after a shock and land use: impacts of droughts on tree loss

Antoine Leblois, INRA

Does forced solidarity hinder adaptation to climate change? Evidence from the Burkina Faso cotton sector

Pauline Castaing, CERDI (Center for Studies and Research on International Development)

THEMATIC SESSION: USING BIG DATA FOR ECOSYSTEM SERVICE VALUATION AND PREFERENCE ASSESSMENT

Room: Room 1.219

Organizer(s): Maria Loureiro, University Santiago de Compostela

Chair: Ian Bateman, University of East Anglia

Big data, including online social media data, represent an extensive source of environmental variables, behavioural data, and attitudes not yet fully explored. The integration of this information with non-market valuation techniques, such as contingent valuation or the travel cost method provides opportunities to complement survey-based investigations and, potentially, creates an alternative to benefit transfer techniques. In addition, the access to real time data allows for quick assessments of interventions which can be quite useful for decision making. This session contains three papers describing recent applications of big data in the area of valuation of ecosystem services and preference assessment, and should contribute to debate among academics and policymakers.

A systematic map of the use of social media data in environmental research: can we crowdsource cultural ecosystem service assessments?

Michael Sinclair, University of Haifa; Andrea Ghermandi, University of Haifa

Exploring geo-tagged photos to assess spatial patterns of visitors in protected areas: the case of park of Etna (Italy)

Giovanni Signorello, University of Catania; Alessandro Torrisi, University of Catania (Italy) University of Liverpool (UK); Giovanni Maria Farinella, University of Catania; Lorenzo Di Silvestro, University of Catania; Giovanni Gallo, University of Catania

Comparing Sentiment Analysis Results from Twitter Conversations across countries

Maria Loureiro, University Santiago de Compostela; Maria Alló, University A Coruña

EAERE SPECIAL SESSION: ERC GRANT WINNERS

Room: Lecture Theatre A

Chair: Carolyn Fischer, Resources for the Future

This special session will showcase recent recipients of European Research Council (ERC) Starting, Consolidator, or Advanced Grants. The grantees will give presentations on their research program and recent findings, after which we will have a round-table discussion about the ERC grant application and award process. This expert panel will provide information and encouragement to EAERE scholars seeking to apply for these prestigious and transformative multi-year grants.

Panelist(s): Cees Withagen, Vrije Universiteit Amsterdam;
Lino Paula, European Research Council

The hidden structure of energy efficiency finance**Nadia Ameli**, UCL; Sumit Kothari, UCL; Giacomo Livan, UCL; Guido Caldarelli, IMT Lucca**Exploring and predicting social impacts of protected areas in Europe****Nikoleta Jones**, Anglia Ruskin University

POLICY SESSION: CARBON PRICING AND INCENTIVES FOR CLEAN INVESTMENT AND INNOVATION

Room: Room 1.218

Organizer(s): Herman Vollebergh, Tilburg University; Alistair Ulph, University of Manchester

Chair: Herman Vollebergh, Tilburg University

This session will consider the latest evidence on the effectiveness of carbon pricing mechanisms (carbon taxation or emission trading schemes) in both reducing emissions and incentivising investment in both existing and new technologies for reducing carbon emissions in the atmosphere. Aspects to be covered include the latest data from OECD's carbon pricing gap; how the Innovation Fund will help to complement and re-inforce incentives for low-carbon innovation beyond the price signal from the EU ETS; whether emission pricing is sufficient to stimulate innovation to reduce emissions, reorient investment capital and reduce stranded assets risk. It will also address empirical analysis of the effectiveness of emissions pricing policies in both reducing GHG emissions and stimulating investment and innovation.

Panelist(s): Florens Simon Flues, OECD;
Peter Zapfel, European Commission;
Jan Kiso, BEIS;
Michael Grubb, University College London and INET;
Herman Vollebergh, Tilburg University

AIR POLLUTION AND HEALTH II

Room: Room 3.204

Chair: Olexiy Kyrychenko, CERGE-EI

Behind the Flames: Unintended Impacts of Straw Burning on Human Capital**Tong Liu**, Hong Kong University of Science and Technology; Peng Zhang, Hong Kong Polytechnic University; Qu Tang, Jinan University; Joshua Graff Zivin, University of California, San Diego; Yingquan Song, Peking University

Discussant: Ipsita Das, Duke University

Social capital and choice of clean cooking and safe sanitation in India**Ipsita Das**, Duke University

Discussant: Martina Zahno, University of Zurich

Health awareness and the transition towards clean cooking fuels: Evidence from Rajasthan, India**Martina Zahno**, University of Zurich; Katharina Michaelowa, University of Zurich; Purnamita Dasgupta, Institute of Economic Growth; Ishita Sachdeva, Delhi University

Discussant: Olexiy Kyrychenko, CERGE-EI

The Impact of the Crisis-Induced Reduction in Air Pollution on Infant Mortality in India: A Policy Perspective**Olexiy Kyrychenko**, CERGE-EI

Discussant: Tong Liu, Hong Kong University of Science and Technology

CLIMATE CHANGE: MARKET-BASED INSTRUMENTS I

Room: Room 2.218

Chair: Yiyi Bai, Zhongnan University of Economics and Law

Demand- versus Supply-Side Climate Policies with a Carbon Dioxide Ceiling

Gilbert Kollenbach, University of Hagen; Thomas Eichner, FernUniversität; Mark Schopf, University of Hagen

Discussant: Robert Hart, Dep. of Economics, Swedish University of Agricultural Sciences

Green paradoxes and red herrings

Robert Hart, Dep. of Economics, Swedish University of Agricultural Sciences; Johan Gars, Royal Swedish Academy of Sciences

Discussant: Rob Dellink, OECD, Paris

The macroeconomic consequences of decoupling materials use

Elisa Lanzi, OECD; Ruben Bibas, OECD; Jean Chateau, OECD; **Rob Dellink**, OECD, Paris

Discussant: Yiyi Bai, Zhongnan University of Economics and Law

Cutting carbon through fuel-switching in the EU ETS

Yiyi Bai, Zhongnan University of Economics and Law; Samuel Okullo, Potsdam Institute for Climate Impact Research

Discussant: Gilbert Kollenbach, University of Hagen

CLIMATE RESPONSE AND UNCERTAINTY I

Room: Room 3.211

Chair: Mohammad M. Khabbazan, University of Hamburg

Cost Risk Analysis: How Robust Is It in View of Weitzman's Dismal Theorem and Underdetermined Risk Functions?

Hermann Held, Universität Hamburg

Discussant: Richard Jaimes, Tilburg University

The Dynamic Effects of Environmental and Fiscal Policy Shocks

Richard Jaimes, Tilburg University

Discussant: Margaret Insley, University of Waterloo

Climate games: Who's on first? What's on second?

Margaret Insley, University of Waterloo; Peter Forsyth, University of Waterloo

Discussant: Mohammad M. Khabbazan, University of Hamburg

Cost-Risk Analysis Reconsidered: What is the true value of information?

Mohammad M. Khabbazan, University of Hamburg

Discussant: Hermann Held, Universität Hamburg

EMPIRICAL ANALYSIS OF FORESTRY II

Room: Room 4.210

Chair: Sabrina Eisenbarth, University of Exeter

Managerial Incentives for Environmental Degradation in Chinese-Style Federalism

Yuanyuan Yi, World Bank; Wolfgang Habel, Centre for European Economic Research (ZEW) and University of Mannheim; Jintao Xu, Peking University

Discussant: Stella Schons do Valle, Virginia Tech

Smallholder Land Clearing and the Forest Code in the Brazilian Amazon

Stella Schons do Valle, Virginia Tech; Lima Eirivelthon, Interamerican Development Bank; Gregory Amacher, Virginia Polytechnic Institute and State University; Frank Merry, Conservation Strategy Fund

Discussant: Angelika Mueller, Heidelberg University

Trees and the Grid - Electrification and Timber Consumption in Nigeria

Angelika Mueller, Heidelberg University

Discussant: Sabrina Eisenbarth, University of Exeter

Can communal resource monitoring save the commons? Evidence from community-managed forests in Uganda

Sabrina Eisenbarth, University of Exeter; Anouk Rigterink, University of Oxford; Louis Graham, Busara Centre for Behavioural Economics

Discussant: Yuanyuan Yi, World Bank

EMPIRICAL ANALYSIS OF RENEWABLE ENERGY I

Room: Room 4.212

Chair: Elke D. Groh, University of Kassel

Excess Capacity, Subsidy Policy and Wind Curtailment in China

Feng Song, Renmin University of China; Feng Song, Renmin University of China

Discussant: Haishan Yu, Shanghai Jiao Tong University

The Clean Development Mechanism and Firm Innovation in Renewable Energy: Evidence from China

Haishan Yu, Shanghai Jiao Tong University; Jingbo Cui, Wuhan University; Yongping Sun, Hubei University of Economics; Xi Liu, Wuhan University

Discussant: Johannes Rode, TU Darmstadt

Opposition to onshore wind power - A study of spill-over effects from local failed projects in Germany and the UK

Johannes Rode, TU Darmstadt; Marcello Graziano, Central Michigan University

Discussant: Elke D. Groh, University of Kassel

On self-interested preferences for sharing the costs of energy policy: A stated choice analysis for Germany

Elke D. Groh, University of Kassel; Andreas Ziegler, University of Kassel

Discussant: Feng Song, Renmin University of China

ENERGY AND GROWTH

Room: Room 4.209

Chair: Olga Ivanova, PBL

Economic consequence analysis of electric power infrastructure disruptions: An analytical general equilibrium approach

Ian Sue Wing, Boston University; **Adam Rose**, Sol Price School of Public Policy, University of Southern California

Discussant: Maria A. Cunha-e-Sa, Universidade Nova de Lisboa

The Pitfalls of Efficiency in Irrigation Modernization

Maria A. Cunha-e-Sa, Universidade Nova de Lisboa; Catarina Roseta-Palma, (ISCTE-IUL), Business Research Unit (BRU-IUL), Lisboa, Portugal;

Discussant: Tunc Durmaz, Yildiz Technical University

Levelized Cost of Consumed Electricity

Aude Pommeret, Université Savoie Mont Blanc; **Tunc Durmaz**, Yildiz Technical University

Discussant: Olga Ivanova, PBL

Modelling the regional impact of the energy transition in the Netherlands: extending a Multi-regional Input-Output framework with a search and matching labour market module

Olga Ivanova, PBL

Discussant: Adam Rose, Sol Price School of Public Policy, University of Southern California

ENERGY CONSERVATION

Room: Room 4.211

Chair: Alastair Fraser, University of Sydney

Heterogeneity of social information programs: the role of identity and values

Cristina Cattaneo, RFF-CMCC European Institute on Economics and the Environment (EIEE), Centro Euro-Mediterraneo sui Cambiamenti Climatici and Fondazione Eni Enrico Mattei (FEEM); Jacopo Bonan, Politecnico di Milano, Department of Management and Economics, EIEE and FEEM; Giovanna d'Adda, University of Milan; Massimo Tavoni, RFF-CMCC European Institute on Economics and the Environment (EIEE), CMCC, Politecnico di Milano

Discussant: Tianqi Chen, Center for Energy and Environmental Policy Research of Beijing Institute of Technology

Energy Conservation Regulations and Enterprises Business Performance: Evidence from China

Hua Liao, Center for Energy Environmental Policy Research of Beijing Institute of Technology; **Tianqi Chen**, Center for Energy and Environmental Policy Research of Beijing Institute of Technology

Discussant: Vera Huwe, Leibniz-Center for European Economic Research

Efficiency Improvements and Resource Conservation - Should we expect Offsetting Behavior from low flow shower heads?

Vera Huwe, Leibniz-Center for European Economic Research

Discussant: Alastair Fraser, University of Sydney

Intensive and Extensive Margin Responses in Electricity Conservation: How Households Respond to Financial Rewards

Alastair Fraser, University of Sydney

Discussant: Cristina Cattaneo, RFF-CMCC European Institute on Economics and the Environment (EIEE), Centro Euro-Mediterraneo sui Cambiamenti Climatici and Fondazione Eni Enrico Mattei (FEEM)

ENVIRONMENT AND BEHAVIOURAL ECONOMICS II

Room: Room 4.204

Chair: Ganga Shreedhar, London School of Economics and Political Science

When second best is best: Strategic bias in the field

Keila Meginnis, University of Glasgow; Daniel Rigby, University of Manchester; Michael Burton, University of Western Australia

Discussant: Tuyen Tiet, University of Strasbourg

Network, social comparison and common pool resource game

Tuyen Tiet, University of Strasbourg; Anne Stenger, INRA- BETA- University of Strasbourg; Phu NGUYEN-VAN, University of Strasbourg

Discussant: Zihan Nie, University of Gothenburg

Resource scarcity and cooperation: evidence from an irrigation system in western China

Zihan Nie, University of Gothenburg; Xiaojun Yang, Xi'an Jiaotong University; Qin Tu, Beijing Normal University

Discussant: Ganga Shreedhar, London School of Economics and Political Science

How to nudge a vegetarian diet? The effect of framing benefits in terms of personal or planetary wellbeing

Ganga Shreedhar, London School of Economics and Political Science; Matteo Galizzi, London School of Economics and Political Science

Discussant: Keila Meginnis, University of Glasgow

INTERNATIONAL ENVIRONMENTAL AGREEMENTS II

Room: Room 4.206

Chair: Francesco Furini, Ca' Foscari University of Venice

International Environmental Agreements Under an Evolutionary Mechanism of Imitation and Asymmetric Countries

Hsiao-Chi Chen, National Taipei University; Yunshyong Chow, Sinica Academia; Shi-Miin Liu, National Taipei University

Discussant: Alaz Safak Munzur, University of Calgary

Optimal Carbon Tariffs, Trade Wars and the Paris Agreement

Alaz Safak Munzur, University of Calgary

Discussant: Francesco Furini, Ca' Foscari University of Venice

The (Un)importance of Stackelberg Leadership for the Formation of (Un)successful International Climate Agreements

Francesco Furini, Ca' Foscari University of Venice; Michael Finus, University of Graz

Discussant: Hsiao-Chi Chen, National Taipei University

NON-MARKET-BASED INSTRUMENTS AND INNOVATION

Room: Room 3.210

Chair: Caroline Orset, Economie Publique, AgroParisTech, INRA, Université Paris-Saclay

Carbon-reducing innovation as the essential policy frontier – towards finding the ways that work

Frank Convery, University College Dublin and Envecon

Discussant: Anna Malova, University of Glasgow

Engineering Institutional Change

Anna Malova, University of Glasgow; Sayantan Ghosal, University of Glasgow; Sharun W. Mukand, University of Warwick

Discussant: Marion Dumas, London School of Economics

Green Product Innovation in Industrial Networks

Marion Dumas, London School of Economics; Eugenie Dugoua, London School of Economics

Discussant: Caroline Orset, Economie Publique, AgroParisTech, INRA, Université Paris-Saclay

Innovation, information, lobby and tort law under uncertainty

Caroline Orset, Economie Publique, AgroParisTech, INRA, Université Paris-Saclay; Julien Jacob, Université de Strasbourg - BETA

Discussant: Frank Convery, University College Dublin and Envecon

RENEWABLE ENERGY - ELECTRICITY MARKET II

Room: Room 3.212

Chair: Jan Abrell, ZHAW Zurich

The real substitution effect of renewable electricity

Philip Schnaars, Universität Hamburg

Discussant: Dominik Schober, ZEW – Leibniz Centre for European Economic Research

Acquisitions in Markets with Frictions? The German Electricity Distribution Sector

Dominik Schober, ZEW – Leibniz Centre for European Economic Research; Michael Hellwig, ZEW – Leibniz Centre for European Economic Research

Discussant: Sylvain Weber, University of Neuchâtel

Who is sensitive to DSM? Understanding the determinants of the shape of electricity load curves and demand shifting: Socio-demographic characteristics, appliance use and attitudes

Sylvain Weber, University of Neuchâtel; Selin Yilmaz, University of Geneva; Martin Patel, University of Geneva

Discussant: Jan Abrell, ZHAW Zurich

Buffering Volatility: Storage Investments and Technology-Specific Renewable Energy Support

Jan Abrell, ZHAW Zurich; Sebastian Rausch, ETH Zurich; Clemens Streitberger, ETH Zurich

Discussant: Philip Schnaars, Universität Hamburg

STATED PREFERENCES

Room: Room 2.219

Chair: Felix Schlaepfer, Kalaidos Fachhochschule

How much do financial incentives influence physical activity and how cost effective are they in reducing health costs and premature mortality? Results from a contingent valuation study in the Basque Country.

Eileen Mitchell, Queen's University Belfast; Alberto Longo, Queen's University Belfast; Anil Markandya, BC3 Basque Centre for Climate Change, University of Bath; Ibon Galarraga, BC3 Basque Centre for Climate Change

Discussant: Malte Welling, Institute for ecological economy research

Eliciting Consequentiality in Stated Preference Surveys: An Application to Urban Green

Ewa Zawojcka, University of Warsaw; Julian Sagebiel, Technische Universität Berlin; **Malte Welling**, Institute for ecological economy research

Discussant: George Hutchinson, Queen's University Belfast

Learning and preference formation in a double bounded contingent valuation study of willingness-to-accept to engage in nested recreational health benefit schemes

George Hutchinson, Queen's University Belfast; Jianjun Tang, School of Agricultural Economics and Rural Development, Renmin University of China; Alberto Longo, Queen's University Belfast; Ruth Hunter, Queens University Belfast; Frank Kee, Queens University Belfast

Discussant: Felix Schlaepfer, Kalaidos Fachhochschule

Towards a Robust Behavioral Economic Design and Analysis of Stated Preferences: Management of Federal Forests in Austria

Felix Schlaepfer, Kalaidos Fachhochschule; Michael Getzner, Vienna University of Technology; Jürgen Meyerhoff, Technische Universität Berlin

Discussant: Eileen Mitchell, Queen's University, Belfast

TRADE AND ENVIRONMENT III

Room: Room 4.205

Chair: Ohad Raveh, Hebrew University of Jerusalem

Firms' Export Responses to Energy Price Variation

Damien Dussaux, MINES ParisTech, PSL University; **Stephanie Monjon**, University Paris Dauphine

Discussant: Stefan Borsky, University of Graz

Natural disasters and firms' export decision

Stefan Borsky, University of Graz

Discussant: Trang Tran, Deakin University

Green Havens and Trade in Environmental Goods

Trang Tran, Deakin University

Discussant: Ohad Raveh, Hebrew University of Jerusalem

Oil Discoveries and Protectionism

Fidel Perez-Sebastian, University of Alicante; **Ohad Raveh**, Hebrew University of Jerusalem; Frederick van der Ploeg, Dep. of Economics, University of Oxford

Discussant: Stephanie Monjon, University Paris Dauphine

WASTE II

Room: Room 4.213

Chair: Amandine Gnonlonfin, University of Nice

Changing the incentive to pollute: Heterogeneous effects of waste pricing policies

Marica Valente, Humboldt University and DIW Berlin

Discussant: Masashi Yamamoto, University of Toyama

Who provides the most cost effective waste management? : Evidence from Japan

Masashi Yamamoto, University of Toyama; Eiji Hosoda, Keio University; Lucy O'Shea, University of Bath; Shasi Nandeibam, University of Bath; Andrew Abbott, University of Hull

Discussant: Mirthe Boomsma, Tilburg University

Fostering behavioral change: Stimulating in-house waste sorting in apartment buildings

Mirthe Boomsma, Tilburg University; Daan Van Soest, Tilburg University; Cees Midden, Eindhoven University of Technology

Discussant: Amandine Gnonlonfin, University of Nice

How much does my garbage really cost? Evidence from French communities

Amandine Gnonlonfin, University of nice; Yusuf Kocoglu, University of Toulon/LEAD

Discussant: Marica Valente, Humboldt University and DIW Berlin

WATER RESOURCES

Room: Room 3.205

Chair: Martin Hänsel, Kiel University

Trade-offs between Water Allocations and Environmental Flows: A Hydro-economic Analysis in the Ebro Basin

Jose Albiac, CITA-Government of Aragon; Daniel Crespo, CITA-Government of Aragon; Taher Kahil, IIASA; Encarna Esteban, University of Zaragoza; Safa Baccour, CITA-Government of Aragon
Discussant: Genius Murwirapachena, Durban University of Technology

Efficiency in South African water utilities: a comparison of estimates from three techniques
Genius Murwirapachena, Durban University of Technology; Jugal Mahabir, University of Johannesburg; Richard Mulwa, University of Nairobi; Johane Dikgang, University of Johannesburg
Discussant: Phoebe Koundouri, Athens University of Economics and Business

Managing transboundary water resources under climate uncertainty: Theory and Application to Omo River Basin in Africa
Phoebe Koundouri, Athens University of Economics and Business; Mike Tsionas, University of Lancaster; Nikolaos Englezos, University of Piraeus
Discussant: Martin Hänsel, Kiel University

Ocean warming and acidification may threaten sustainability of commercial Arctic fishery
Martin Hänsel, Kiel University; Martin Quaas, Leipzig University; Rudi Voss, Kiel University; Jörn Schmidt, Kiel University; Max Stöven, Kiel University; Martina Stiasny, Pelagic Fish Research Group, Institute of Marine Research
Discussant: Jose Albiac, CITA-Government of Aragon

Coffee break

Friday, 10.15-10.45

POSTER SESSION 2

Room: Drum Area, G/F

[2-1] A Framework for designing Behavioral Economic policy tools to reduce marine plastic debris

Francisco Alpizar, Tropical Agricultural Research and Higher Education Center (CATIE); Fredrik Carlsson, University of Gothenburg; Reza Daniels, University of Cape Town; Thong Ho, Ho Chi Minh City University of Economics (UEH) - EfD Vietnam; Marcela Jaime Torres, University of Concepción; Zihan Nie, University of Gothenburg; **Gracia Maria Lanza Castillo**, Tropical Agricultural Research and Higher Education Center (CATIE); César Salazar, Universidad del Bio-Bio; Byela Tibesigwa, Environment for Development (EfD) Tanzania; Martine Visser, University of Cape Town; Shivani Wahdera, Indian Statistical Institute (ISI)

[2-2] Benefit cost analysis when uncertainty is fundamental: An application to deep sea mining

David Good, Indiana University; Kerry Krutilla, Indiana University; Michael Toman, World Bank; Tijan Arin, World Bank

[2-3] Consumer Preferences for More Sustainable and Healthier Lifestyles: Five-country Discrete Choice Experiments

Milan Scasny, Charles University in Prague; **Iva Zverinova**, Charles University, Prague; Vojtech Maca, Charles University, Prague

[2-4] Consumers in a circular economy: economic analysis of household waste sorting behaviour

Doan Nainggolan, Aarhus University; Anders Branth Pedersen, Aarhus University; Sinne Smed, Copenhagen University; Kahsay Haile Zemo, Aarhus University; Berit Hasler, Aarhus University; Mette Termansen, Copenhagen University

[2-5] Controlling an Invasive Species through Consumption: The Case of Lionfish as an Impure Public Good

Ash Morgan, Appalachian State University; David McEvoy, Appalachian State University; Paul Hindsley, Eckerd College

[2-6] Economic benefits of achieving a good environmental status in European marine waters – evidence from three Baltic Sea countries

Tuija Lankia, Natural Resources Institute Finland; Heini Ahtiainen, Natural Resources Institute Finland (Luke); Jürgen Meyerhoff, Technische Universität Berlin; Eija Pouta, Natural Resources Institute Finland (Luke); Christine Bertram, Kiel Institute for the World Economy; Kristine Pakalniete, AktiVS Ltd; Katrin Rehdanz, Christian-Albrechts-University Kiel; Janne Artell, Natural Resources Institute Finland (Luke)

[2-7] How much is marine wildlife worth? Estimating preferences of tourists for marine conservation and tourism infrastructure in Costa Rica.

Alicia Egenes, Norwegian University of Life Sciences and Charles University in Prague; Milan Scasny, Charles University in Prague

[2-8] On the Efficient and Robust Protection of the German Baltic Sea Coast against Flooding

Thomas David van der Pol, Global Climate Forum; Jochen Hinkel, Global Climate Forum; Jan Merckens, Kiel University; Leigh MacPherson, Siegen University; Arne Arns, Siegen University; Athanasios Vafeidis, Kiel University

[2-9] Productive Efficiency of Connecticut Long Island Lobster Fishery Using a Novel Finite Mixture Model

Zinnia Mukherjee, Simmons University; Rangan Gupta, University of Pretoria; Mike Tsonas, Lancaster University; Peter Wanke, Federal University of Rio de Janeiro

[2-10] Realities of decision-making for built and natural water infrastructure in the Volta Basin

Laetitia Pettinotti, London School of Economics and Political Sciences; Bea Mosello, Critical Resources; Marloes Mul, UNESCO-IHE; Evgeniie Matrosov, University of Manchester; James Dalton, IUCN

[2-11] State-of-the Art Valuation of Wetland Ecosystem Services in Small Island Developing States: A Systematic Review and Framework for Future Research in Valuing Island Ecosystems

Stephan Moonsammy, University of the West Indies; **Mattias Boman**, The University of the West Indies; Vidwatee Ramdhanie, University of the West Indies; Donna-Marie Renn-Moonsammy, University of the West Indies

[2-12] Valuing conservation benefits of marine protected areas in Italy

Stefania Tonin, Università IUAV di Venezia

Lunch

Friday, 12.45-14.00

-
- EAERE General Assembly – Room 1.219, *please have lunch before*
 - * Journal Board Meeting REE – Room 2.217 (12:15 – 14:00)

* - by invitation only

PARALLEL SESSION 5
FRI 14:00-15:45

**THEMATIC SESSION: CLIMATE CHANGE – HEALTH –
NUTRITION – LABOUR PRODUCTIVITY NEXUS**

Room: Room 1.218

Organizer(s): Shouro Dasgupta, Fondazione CMCC, Università Ca' Foscari Venezia, EIEE; Joacim Rocklöv, Umeå University

Chair: Francesco Bosello, Fondazione Eni Enrico Mattei

The impact of climate change will be multifaceted, threatening to undermine the last half century of advances in global health, affecting many of the socioeconomic dynamics such as labour productivity, labour supply, and economic output. Along with direct impacts, climate change will also have indirect influence on health and labour through nutrition and calorie intake. It is critical that we investigate and disseminate these direct and indirect impacts of climate change. This session will combine analysis from multiple disciplines using high-resolution climatic data, longitudinal micro surveys, spatial econometrics, and Overlapping Generation Models. The focus will be on health impacts of climate hazards, impact of climatic stressors on labour productivity in the EU, and the effects of climatic shocks on labour supply through dietary intakes. The three papers are connected to the nexus through their investigations of each of the components of health, labour productivity, and nutrition but also in that they study both the historical relationships and provide projections on the future impacts on climate change.

An extract from the 2018 report of the Lancet Countdown on health and climate change: shaping the health of nations for centuries to come

Elizabeth Robinson, University of Reading

A Chink in the Armour: How strong European economies are threatened by climate change

Shouro Dasgupta, Fondazione CMCC, Università Ca' Foscari Venezia, EIEE; Jessie Granadillos, Climate Analytics; Fahad Saeed, Climate Analytics; Malcolm Mistry, CMCC and Università Ca' Foscari Venezia

Climate change and its economy-wide impact in Uganda

Shouro Dasgupta, Fondazione CMCC, Università Ca' Foscari Venezia, EIEE; Chiara Antonelli, University of Rome Tor Vergata; Manuela Coromaldi, University of Rome "Niccolò Cusano"; Soheil Shayegh, European Institute on Economy and the Environment (EIEE); Johannes Emmerling, European Institute on Economy and the Environment (EIEE)

THEMATIC SESSION: CLIMATE POLICY AND FINANCE

Room: Room 1.219

Organizer(s): Armon Rezai, Vienna University of Economics and Business; Frederick van der Ploeg, Dep. of Economics, University of Oxford

Chair: Frederick van der Ploeg, Dep. of Economics, University of Oxford

Unanticipated climate policy curbs the value of physical capital that is costly to adjust. In this session we study how climate policy geared at keeping peak global warming below 2 degree Celsius affects economies, their fossil industries, and financial markets invested in them. The papers presented show how various sources of uncertainty affect optimal climate policy in a cooperative and uncooperative setting; how oil and gas majors adjust their investment and extraction behaviour to uncertainty about future climate policies, and the implications of temperature changes on asset valuation, applying empirical finance methods to estimate the effects of long-term temperature shifts on asset valuations. In this thematic session we aim to provide conference participants with some of the latest research at the nexus of climate policy and finance, i.e. how climate change and climate policy impact financial valuations.

The Carbon Abatement Game

Hambel Christoph, Goethe University Frankfurt; Holger Kraft, Goethe University Frankfurt; Eduardo Schwartz, UCLA

Policy Tipping and Stranded Carbon Assets

Frederick van der Ploeg, Dep. of Economics, University of Oxford; Armon Rezai, Vienna University of Economics and Business

EAERE SPECIAL SESSION: POLICY AND ACADEMIA: BRIDGING THE GAP

Room: Lecture Theatre A

Organizer(s): Simone Borghesi, European University Institute; Jos Delbeke, European University Institute

Chair: Simone Borghesi, European University Institute

The session organized by the EAERE POC intends to discuss how to facilitate and create a more integrated dialogue between academia and policy world. The two contexts have departed from each other over time, becoming increasingly technical and partially separated. To fill the gap between these two realms, there is a need to substantiate quantitatively what policies work and what their relative contribution is. In line with the aim of the EAERE POC (i.e. providing advice and support to EU policy makers and institutions in designing policy interventions), a few questions will be addressed during the session to facilitate and promote the discussion: (i) Which policies instruments have performed better/worst so far? (ii) What are the main results emerging from ex-post evaluation of specific policies? (iii) Where are such evaluations needed mainly?

Panelist(s): Christian Gollier, Toulouse School of Economics;

Peter Zapfel, European Commission;

Phoebe Koundouri, Athens University of Economics and Business;

Simon Dietz, LSE;

Herman Vollebergh, Tilburg University;

Thomas Sterner, University of Gothenburg;

Ben Groom, London School of Economics;

Dominique Bureau, Economic Council for Sustainable Development, Paris;

Aldo Ravazzi Douvan, Italian Min.of Environment - Sogesid TA - OECD-WPEP - Luiss -

Tor Vergata

POLICY SESSION: THE CONTRIBUTION OF RESOURCE

Room: Room 2.220

CYCLING TO SUSTAINABILITY AND RESOURCE EFFICIENCY

Organizer(s): Tom Murray, DEFRA; Alistair Ulph, University of Manchester

Chair: Christoph Böhlinger, University of Oldenburg

This session will assess the latest design of policies to encourage resource cycling to help a shift to a more sustainable use of natural materials and evaluate their effectiveness. The session will address these issues at the international, national and regional levels. It will discuss some of the insights from OECD's RE-CIRCLE project to provide policy guidance on resource efficiency and the transition to a circular economy, aiming to identify and quantify the impact of these policies through quantitative and qualitative analysis. It will reflect on the UK Government's Resources and Waste Strategy for England, its recent consultation announcements and the policy commitments that will drive resource efficiency; and also on the innovative policies introduced by the Welsh Government. Finally it will consider empirical work on the contribution of recycling to enhancing resource efficiency.

Panelist(s): Rob Dellink, OECD, Paris;

Tom Murray, DEFRA;

Andy Rees, Welsh Government;

Christoph Böhlinger, University of Oldenburg

AIR POLLUTION ON URBAN POPULATION

Room: Room 3.212

Chair: Sefi Roth, London School of Economics

Does China Fall into Poverty-Environment Traps? Evidence from Long-term Income Dynamics and Urban Air Pollution

ZhongXiang Zhang, Tianjin University; Jian-Xin Wu, Jinan University; Ling-Yun He, Jinan University

Discussant: Pierre Levasseur, IRSTEA (French Research Institute for Environment and Agriculture)

Why people (continue to) live near mining and industrial sites? Empirical evidence from France, Portugal and Spain

Pierre Levasseur, IRSTEA (French Research Institute for Environment and Agriculture); Katrin Erdlenbruch, IRSTEA; Christelle Gramaglia, IRSTEA
Discussant: Yiannis Kountouris, Imperial College London

The effect of air pollution on aggressive and violent behavior: evidence from English football.

Yiannis Kountouris, Imperial College London
Discussant: Sefi Roth, London School of Economics

Dirty Density: Air Quality and the Density of American Cities

Sefi Roth, London School of Economics; Felipe Carozzi, London School of Economics
Discussant: ZhongXiang Zhang, Tianjin University

BIODIVERSITY

Room: Room 4.210

Chair: Endre Kildal Iversen, Norwegian University of Life Sciences

Estimating non-market values of fruit tree diversity in the Czech Republic

Nicholas Tyack, IHEID; Milan Scasny, Charles University in Prague
Discussant: Katarzyna Zagórska, University of Warsaw

Discussant: Victor Champonnois, IRSTEA

Coffee break

Friday, 15.45-16.15

PARALLEL SESSION 6
FRI 16:15-18:00

THEMATIC SESSION: ASSESSING THE MARKET STABILITY RESERVE OF THE EU-ETS

Room: Room 1.219

Organizer(s): Carolyn Fischer, Resources for the Future; Michael Pahle, Potsdam Institute for Climate Impact Research (PIK); Simon Quemin, London School of Economics

Chair: Carolyn Fischer, Resources for the Future

In 2018 the EU adopted a major reform of its Emission Trading Scheme (ETS) that included intake and cancellation of allowances through the so called Market Stability Reserve (MSR). A primary motivation was to permanently reduce the surplus of allowances, expecting that this would increase prices to higher levels for good. While allowances prices indeed went up over the last months, its effects on long-term price development and volatility are still poorly understood. Yet the MSR will be reviewed in 2021, which is why filling this knowledge gap is of high policy relevance. The three papers in this session analyse different market and design related factors determining their impact, and thus provide a comprehensive assessment of the MSR that can inform the upcoming review.

Intertemporal Emissions Trading and Market Design: An Application to the EU-ETS

Simon Quemin, London School of Economics; Raphael Trotignon, CEC, Paris-Dauphine University

Understanding overlapping policies: Internal carbon leakage and the punctured waterbed

Arthur van Benthem, University of Pennsylvania; Robert Ritz, University of Cambridge; **Grischa Perino**, University of Hamburg

On the performance of the different components of the EU ETS MSR

Michael Pahle, Potsdam Institute for Climate Impact Research (PIK); Eva-Maria Mauer, Potsdam Institute for Climate Impact Research (PIK); Samuel J Okullo, Potsdam Institute for Climate Impact Research (PIK)

EAERE SPECIAL SESSION: BEST DOCTORAL DISSERTATION AWARDEES

Room: Lecture Theatre A

Chair: Mireille Chiroleu-Assouline, Paris School of Economics, University Paris 1 Pantheon-Sorbonne

The EAERE Award for Best Doctoral Dissertations in Environmental and Resource Economics is given to encourage and recognize outstanding and innovative academic achievement in the field of Environmental and Resource Economics. Dissertations must have been written as part of a graduate course of study at an accredited academic European institution and defended in the calendar year preceding the year in which the award is announced. Three dissertations will be awarded every year after peer review of all submissions. This thematic session, organized by the EAERE Council, features the three 2019 winners who will present the best paper coming from their dissertation

How Effective Was the UK Carbon Tax? A Machine Learning Approach to Policy Evaluation

Jan Abrell, ZHAW - Zurich University of Applied Sciences; **Mirjam Kosch**, ZHAW - Zurich University of Applied Sciences and ETH Zurich; Sebastian Rausch, ETH Zurich

Dynamic heterogeneity: rational habits and the heterogeneity of household responses to gasoline prices

Aurélien Saussay, Sciences Po

The risk-adjusted carbon price

Frederick van der Ploeg, Dep. of Economics, University of Oxford; **Ton van den Bremer**, Vrije Universiteit Amsterdam and University of Oxford

POLICY SESSION: APPLICATIONS OF NATURAL CAPITAL IN POLICY MAKING

Room: Room 2.220

Organizer(s): Ian Bateman, University of East Anglia; Alistair Ulph, University of Manchester

Chair: Ian Bateman, University of East Anglia

This session will consider the latest thinking on bringing natural capital into decision making across all levels of government (international, national, regional), private companies and individuals. For example, at the European level, the session will provide an overview of the Knowledge and Innovation

Project on an Integrated system for Natural Capital and ecosystem services Accounting (KIP INCA) set up by the European Commission, then assess the outcomes and policy applications for a range of 6 ecosystem services. For the UK, the session will outline the work of the Natural Capital Committee, its role in a range of government proposals, and the incorporation of the natural capital approach into the H.M. Treasury 'Green Book' guidance for public spending. The session will consider an application of Natural Capital Accounting to the case study of reducing flooding in the Bristol Channel. It will also consider innovative work on natural capital at the urban level using the example of the Greater Manchester Combined Authority. Finally, the session will discuss the importance of natural capital thinking in influencing investors who want to be able to measure the impacts of their investments and give examples of how this has been achieved.

Panelist(s): Walid Oueslati, OECD;
Alessandra La Notte, European Commission Joint Research Centre;
Steven Arnold, Environment Agency;
Ece Ozdemiroglu, Economics for the Environment Consultancy Ltd;
Krista Patrick, GMCA;
Ian Bateman, University of East Anglia

POLICY SESSION: TOWARD 100% CLEAN ENERGY: Room: Room 1.218
ECONOMIC AND POLITICAL CONSIDERATIONS FOR ENERGY STORAGE IN FUTURE ENERGY SYSTEMS

Organizer(s): Maureen Lackner, Environmental Defense Fund; Steven Koller, Environmental Defense Fund

Chair: Thomas Sterner, University of Gothenburg

As renewable energy capacity expands around the world, energy storage will play an important role in the decarbonisation of the electricity sector through its energy arbitrage capabilities. Achieving significant levels of deployment will require innovative policy solutions. One example is the use of reverse auctions (multiple sellers, one buyer), which can provide transparency on actual costs of storage and reduce the price of procuring new capacity. In this session speakers will discuss the scale and costs of energy storage, demonstrate the value of such storage, present evidence on the role of reverse auctions, and shed light on the European Commissions to leverage policy tools like reverse auctions to spur renewable energy and storage capacity.

Panelist(s): Geoffrey M. Heal, Columbia Business School;
Katheline Schubert, University of Paris;
Thomas Stoerk, European Commission; LSE

CLIMATE CHANGE AND CGE MODELLING Room: Room 4.209
Chair: Christoph Böhringer, University of Oldenburg

Constrains on climate change adaptation: Evidence from sea level rise

Theodoros Chatzivasileiadis, ZEW; Marjan Hofkes, Department of Economics, Vrije Universiteit Amsterdam, The Netherlands; Onno Kuik, Institute for Environmental Studies, Vrije Universiteit Amsterdam; Richard Tol, University of Sussex
Discussant: Nina Knittel, University of Graz

A global analysis of heat-related labour productivity losses under climate change - implications for Germany's foreign trade

Ivan Petrov, University College Dublin; Sarah La Monaca, University College Dublin; Lisa Ryan, University College Dublin

Discussant: Joshua Linn, University of Maryland; Resource for the Future

How Do Passenger Vehicle Greenhouse Standards Affect Vehicle Quality ?

Yujie Lin, University of Maryland; **Joshua Linn**, University of Maryland; Resource for the Future

Discussant: Jeremy van Dijk, University of Neuchâtel

The impact of public charging infrastructure on electric vehicle adoption: Evidence from Norway

Jeremy van Dijk, University of Neuchâtel; Nathan Delacrétaç, Université de Neuchâtel; Bruno Lanz, University of Neuchâtel

Discussant: Sandra Rousseau, KU Leuven, Faculty of Economics and Business, CEDON

WASTE III - PLASTIC BAGS

Room: Room 2.219

Chair: **Johane Dikgang**, University of Johannesburg

A Model of Marine Litter in Sustainable Fisheries

Linh Nguyen, Institute for Environmental Studies, Vrije Universiteit Amsterdam; Roy Brouwer, The Water Institute / University of Waterloo; Pieter van Beukering, Institute for Environmental Studies (IVM) - Vrije Universiteit Amsterdam

Discussant: Rebecca Taylor, University of Sydney

Bag Leakage: The Effect of Disposable Carryout Bag Regulations on Unregulated Bags

Rebecca Taylor, University of Sydney

Discussant: Marcelo Caffera, University of Montevideo

Is the willingness to pay for plastic bags low? Evidence from a pricing initiative

Marcelo Caffera, University of Montevideo; José María Cabrera, University of Montevideo; Alejandro Cid, University of Montevideo

Discussant: Johane Dikgang, University of Johannesburg

Using contingent behaviour analysis to measure the price elasticity of demand for plastic bags

Johane Dikgang, University of Johannesburg; Jugal Mahabir, University of Johannesburg; Zafeer Ravat, University of Johannesburg

Discussant: Linh Nguyen, Institute for Environmental Studies, Vrije Universiteit Amsterdam

WATER SCARCITY

Room: Room 3.205

Chair: Roy Brouwer, The Water Institute / University of Waterloo

Virtual Water Trade: The Implications of Capital Scarcity

Hamed Ghodduzi, Stevens Institute of Technology; Mohamad Afkhami, Stevens Institute of Technology;

Thomas Bassetti, University of Padua; Filippo Pavesi, University of Verona

Discussant: Hao Zhao, California Institute of Technology

Surface Water Trading and Groundwater Depletion in California

Hao Zhao, California Institute of Technology

Discussant: Leila Eamen, School of Environment and Sustainability, University of Saskatchewan

The Economic Impacts of Water Supply Restrictions due to Climate and Policy Change: an Inter-regional Supply-side Input-Output Analysis at Transboundary River Basin Scale

Leila Eamen, School of Environment and Sustainability, University of Saskatchewan; Roy Brouwer, The Water Institute / University of Waterloo; Saman Razavi, School of Environment and Sustainability, University of Saskatchewan

Discussant: Jorge Garcia, University of Waterloo

Assessing the Economic Impacts of Water Scarcity on the Great Lakes Basin using a Supply-Side Input-Output Model

Jorge Garcia, University of Waterloo; Roy Brouwer, The Water Institute / University of Waterloo; Rute Pinto, University of Waterloo

Discussant: Thomas Bassetti, University of Padua

Conference dinner

Friday, 19.00-23.00

PARALLEL SESSION 7
SAT 09:00-10:45

Parallel session 7

Saturday, 09.00-10.45

THEMATIC SESSION: MICROECONOMIC PANEL STUDIES ON CLIMATE CHANGE EXPECTATIONS AND ADAPTATIONS: THE EFFECTS OF EXTREME WEATHER EXPERIENCES

Room: Lecture Theatre A

Organizer(s): Daniel Osberghaus, ZEW – Leibniz Centre for European Economic Research; Pike Brown, Manaaki Whenua - Landcare Research; Katharina Lehmann-Uchner, German Institute for Economic Research (DIW Berlin)

Chair: Daniel Osberghaus, ZEW – Leibniz Centre for European Economic Research

The microeconomic analysis of expectations regarding future climate and any resulting adaptation undertaken by households is hampered by significant identification challenges. Longitudinal/panel data may be used to control for unobserved and unobservable factors, thereby helping to identify causal relationships between exposure to climate-related natural disasters and both expectations of future climate and anticipatory adaptation. Such data are also ideally suited to assess dynamics in expectations and behaviours. However, such data are rare. In this session, we bring together three of the very few micro panel studies on climate change that exist globally; each study assesses expectations, behaviour, and/or anticipation of future climate change using multiple survey waves. Baseline data are used to describe the correlates of future climate expectations, and the longitudinal nature of the data is exploited to evaluate the impact of extreme weather events on beliefs and updating of expectations.

Effects of extreme weather experience on climate change belief

Daniel Osberghaus, ZEW – Leibniz Centre for European Economic Research; Carina Fugger, ZEW - Leibniz Centre for European Economic Research

Drought intensity, future expectations, and the durability of climate beliefs

Pike Brown, Manaaki Whenua - Landcare Research; Patrick Walsh, Manaaki Whenua - Landcare Research; Pam Booth, Manaaki Whenua - Landcare Research

When shocks become persistent: Household-level asset growth in the aftermath of an extreme weather event

Kati Kraehnert, German Institute for Economic Research (DIW Berlin); **Katharina Lehmann-Uchner**, German Institute for Economic Research (DIW Berlin)

THEMATIC SESSION: RECENT ADVANCES IN THE THEORETICAL UNDERSTANDING OF SOLAR GEOENGINEERING

Room: Room 1.219

Organizer(s): Lassi Ahlvik, Norwegian School of Economics; Daniel Heyen, ETH Zurich; Gernot Wagner, Harvard University

Chair: Lassi Ahlvik, Norwegian School of Economics

Solar geoengineering, aka as Solar Radiation Management, is increasingly discussed in the context of temperature targets such as the 1.5C goal. Besides its policy relevance, solar geoengineering also challenges and inspires economic thinking. This session brings together three theoretical contributions at the forefront of solar geoengineering economics, focused on the value of research and experimentation, the termination effect, and the interplay of free-riding and free-driving.

Geoengineering Bandits

Lassi Ahlvik, Norwegian School of Economics; Gernot Wagner, Harvard University

Solar Radiation Management Termination: knowing when to start by knowing when to stop
Sjak Smulders, Tilburg University; Martin Quaas, Leipzig University; Wilfried Rickels, Kiel Institute for the World Economy; Juan Moreno-Cruz, U of Waterloo

Free-riders and free-drivers: Non-cooperative public good provision by heterogeneous agents

Daniel Heyen, ETH Zurich; Alessandro Tavoni, University of Bologna

POLICY SESSION: CLIMATE CHANGE AND HEALTH

Room: Room 1.218

Organizer(s): Elizabeth Robinson, University of Reading

Chair: Elizabeth Robinson, University of Reading

The impacts of climate change on health are already visible. The Lancet Countdown tracks indicators across five domains of health and climate change highlights the health impacts of increasing heat and heatwaves including direct effects such as increased cardiovascular and renal disease and indirect impacts such as increased spread of vectors transmitting pathogens and falling labour productivity. Optimal government policy requires understanding costs, benefits distributional impacts and feasibility of designing strategies that both reduce emissions and improve climate-related health. This session brings together medical and public health practitioners and economists expert in the cost-benefit analysis of climate change mitigation to explore the extent to which can induce cost-effective changes in behaviour that improves health and environmental outcomes.

Panelist(s): Virginia Murray, Public Health England;

Nick Watts, Executive Director of Lancet Countdown;

Hilary Graham, University of York;

Subhrendu K Pattanayak, Duke University;

Ariane Kehlbacher, School of Agriculture, Policy and Development, University of Reading

POLICY SESSION: ENERGY TRANSITION: THE CASE OF ISRAEL

Room: Room 2.220

Organizer(s): Ruslana Rachel Palatnik, Yezreel Valley Academic College, EAERE Country representative

Chair: Ruslana Rachel Palatnik, Yezreel Valley Academic College, EAERE Country representative

A historically dependant, centralized and isolated energy island, Israel is now undergoing a swift and large transition. The energy flow changes dramatically, crowding out imported fuels in favour of domestic natural gas and renewable fuels, and the transport sector is being electrified. The electricity market is being reformed through partial privatisation, the system operator is becoming independent and the market is being restructured to facilitate competitiveness. The newfound natural gas discoveries turn Israel into an energy exporter for the first time. These trends present challenging shifts for policy-makers and market stakeholders. This policy session will describe the economic implications, the policy measures and the future challenges facing Israel's energy transition.

Panelist(s): Ruslana Rachel Palatnik, Yezreel Valley Academic College, EAERE Country representative;

Nurit Gal, Electricity Authority;

Ofira Ayalon, SNI, University of Haifa;

Idan Liebes, Samuel Neaman Institute

AIR POLLUTION IN CHINA

Room: Room 3.212

Chair: Rong Ma, Tsinghua University

Air Pollution Violations in China

Wei Guo, University of California, Berkeley

Discussant: Bing Zhang, Nanjing University

Go Away from Beijing: The Leakage of Industrial Emission in China

Bing Zhang, Nanjing University

Discussant: Tong Zhu, The Economic and Social Research Institute

Regulation through revelation: The effect of pollution monitoring on labour demand in China

Tong Zhu, The Economic and Social Research Institute; Puyang Sun, Nankai University

Discussant: Rong Ma, Tsinghua University

Regulating air pollution under pollutant spillover: Evidence from the 2+26" Cities

Jing Cao, tsinghua university; **Rong Ma**, Tsinghua University

Discussant: Wei Guo, University of California, Berkeley

BEHAVIOUR OF ENERGY CONSUMERS

Room: Room 4.204

Chair: Ricardo Daziano, Cornell University

Low energy literacy undermines the effectiveness of energy labels – insights from appliance choice experiments in the EU

Marie-Charlotte Guetlein, Grenoble Ecole de Management; Joachim Schleich, Grenoble Ecole de Management; Corinne Faure, Grenoble Ecole de Management; Gengyang Tu, École Supérieure d'Agricultures, Université Bretagne Loire

Discussant: Julia Blasch, Vrije Universiteit Amsterdam, Institute for Environmental Studies (IVM)

Behavioral anomalies and energy-related individual choices: the role of status-quo bias

Julia Blasch, Vrije Universiteit Amsterdam, Institute for Environmental Studies (IVM); Claudio Daminato, ETH Zurich, Centre for Energy Policy and Economics (CEPE)

Discussant: Tensay Hadush Meles, University College Dublin

Billing Education and Consumption Behavior: Experimental Evidence from Nonlinear Electricity Tariff

Tensay Hadush Meles, University College Dublin

Discussant: Ricardo Daziano, Cornell University

Flexible customer willingness to pay for bundled smart home energy products and services

Ricardo Daziano, Cornell University

Discussant: Marie-Charlotte Guetlein, Grenoble Ecole de Management

CHOICE MODELLING II

Room: Room 4.205

Chair: Katrina Davis, University of Exeter

Do heterogeneous tourists and residents value differently coastal erosion management? Evidence from Hoian (Vietnam), a UNESCO World Heritage Site

Thi Lan Anh Nguyen, French National Institute of Higher Education in Agricultural Sciences (SupAgro Montpellier); Michel Simioni, The Institut national de la recherche agronomique; Arnaud Reynaud, Toulouse School of Economics; Manh-Hung N'Guyen, TSE(INRA); Cecile Aubert, University of Bordeaux (GREThA)

Discussant: Silvia Ferrini, Department of Political Science and International, University of Siena and Centre for Social and Economic Research on the Global Environment, University of East Anglia

Green vs. Gray Infrastructures for coastal protection: a choice experiment in the Maddalena Archipelago National Park

Silvia Ferrini, Department of Political Science and International, University of Siena and Centre for Social and Economic Research on the Global Environment, University of East Anglia; Rossella Atzori, University of Cagliari; Sandro De Muro, Coastal and Marine Geomorphology Group, Department of Chemical and Geological Sciences, University of Cagliari

Discussant: Katrina Davis, University of Exeter

Preference vs. Production Functions in Integrated Choice Experiments

Katrina Davis, University of Exeter; Michael Burton, University of Western Australia

Discussant: Thi Lan Anh Nguyen, French National Institute of Higher Education in Agricultural Sciences (SupAgro Montpellier)

CLIMATE CHANGE AND AGRICULTURE IN DEVELOPING COUNTRIES

Room: Room 4.213

Chair: Lotanna Emediegwu, University of Manchester

To what extent do climate-related risks affect agricultural productivity? Empirical evidence from smallholder maize farmers in Tanzania

Robertson Khataza, Lilongwe University of Agriculture Natural Resources

Discussant: Irene Staffieri, Sapienza University of Rome

Weather anomalies and spatial heterogeneity in farm-gate prices: evidence from Uganda maize farmers

Irene Staffieri, Sapienza University of Rome; Pierluigi Montalbano, Sapienza University of Rome;
Richard Tol, University of Sussex
Discussant: Paolo Agnolucci, University College London

The Impact of Weather on the Trade of Agricultural Commodities

Chrysanthi Rapti, University College London; **Paolo Agnolucci**, University College London
Discussant: Lotanna Emediegwu, University of Manchester

The Impacts of Climate Change on Agriculture in Sub-Saharan Africa: A Spatial Panel Data Approach

Lotanna Emediegwu, University of Manchester
Discussant: Robertson Khataza, Lilongwe University of Agriculture Natural Resources

CLIMATE RESPONSE AND UNCERTAINTY II

Room: Room 3.204

Chair: Michael Grubb, University College London and INET

Would Solar Geoengineering Devalue Research on Climate Response?

Elnaz Roshan, University of Hamburg
Discussant: Anastasios Xepapadeas, Athens University of Economics and Business

Regional Climate Policy under Deep Uncertainty

Anastasios Xepapadeas, Athens University of Economics and Business; William Brock, University of Wisconsin and University of Missouri
Discussant: Felix Schreyer, Potsdam Institute for Climate Impact Research

How to formulate climate targets under uncertainty and anticipated future learning about climate sensitivity? – An axiomatic review of the strong sustainability paradigm

Felix Schreyer, Potsdam Institute for Climate Impact Research; Hermann Held, Universität Hamburg
Discussant: Michael Grubb, University College London and INET

Systems Innovation, Inertia and Pliability: A mathematical exploration with implications for climate change abatement

Michael Grubb, University College London and INET
Discussant: Elnaz Roshan, University of Hamburg

EMPIRICAL ANALYSIS OF MANUFACTURING FIRMS

Room: Room 3.210

Chair: Ingmar Juergens, German Institute for Economic Research, DIW Berlin

Energy endowments and the location of manufacturing plants

Edward Manderson, University of Manchester, UK
Discussant: Maja Zarkovic, University of Basel

Economically, do environmentally regulated firms perform worse? Lessons from the German manufacturing sector

Maja Zarkovic, University of Basel
Discussant: Soo Keong Yong, Xi an Jiaotong-Liverpool University

Does 'Green' Matter? Environmental Management and Firm Performance in China

Soo Keong Yong, Xi an Jiaotong-Liverpool University; Laure de Preux, Imperial College London;
Mirabelle Muuls, Imperial College Business School; Peiyao Shen, ShanghaiTech University
Discussant: Ingmar Juergens, German Institute for Economic Research, DIW Berlin

Do corporate GHG emissions and their disclosure affect information asymmetry and firm value?

Ingmar Juergens, German Institute for Economic Research, DIW Berlin
Discussant: Edward Manderson, University of Manchester, UK

FORESTRY

Room: Room 4.210

Chair: Ibtisam Al-Abri, Sultan Qaboos University

The Risk of Catastrophic Disturbances in a Market Level Age-Structured Forest Model

Olli-Pekka Kuusela, Oregon State University; **Jussi Lintunen**, Natural Resources Institute Finland (Luke)
Discussant: Jenni Miettinen, University of Helsinki, Department of Economics and Management

Cost function approach to water protection in forestry

Jenni Miettinen, University of Helsinki, Department of Economics and Management; Markku Ollikainen, University of Helsinki; Mika Nieminen, Natural Resources Institute Finland (Luke); Lauri Valsta, University of Helsinki
Discussant: Paola Ovando, The James Hutton Institute

Forest management and natural capital with an application to Mediterranean silvopastoral systems

Paola Ovando, The James Hutton Institute; Giles Atkinson, London School of Economics; Marcelo Olivera, Universidad Autónoma Metropolitana, Cuajimalpa, Mexico; Carlos Rodriguez-Lucatero, Universidad Autónoma Metropolitana, Cuajimalpa, Mexico
Discussant: Ibtisam Al-Abri, Sultan Qaboos University

The Interaction of Wildfire Risk Mitigation Policies in the Presence of Heterogeneous Landowners and Spatial Externalities

Ibtisam Al-Abri, Sultan Qaboos University; Kelly Grogan, University of Florida
Discussant: Jussi Lintunen, Natural Resources Institute Finland (Luke)

FOSSIL FUEL AND CLIMATE CHANGE

Room: Room 3.211

Chair: Mireille Chiroleu-Assouline, Paris School of Economics, University Paris 1 Pantheon-Sorbonne

Bottom-up world climate policies: Preserving fossil fuel deposits vs. capping fuel consumption

Thomas Eichner, FernUniversität; Ruediger Pethig, Universität Siegen
Discussant: Louison Cahen-Fourot, Vienna University of Economics and Business (WU)

Capital stranding cascades: The impact of decarbonisation on productive asset utilisation

Emanuele Campiglio, Vienna University of Economics and Business (WU); **Louison Cahen-Fourot**, Vienna University of Economics and Business (WU); Eric Kemp-Benedict, Stockholm Environment Institute; Elena Dawkins, Stockholm Environment Institute; Antoine Godin, Agence Française de Développement
Discussant: Roberto Ferreira da Cunha, IHS CERA

Hotelling's Sweet Spot

Roberto Ferreira da Cunha, IHS CERA; Antonin Pottier, Centre d'Economie de la Sorbonne; Jean-Charles Hourcade, CIRED, Centre International de Recherche sur l'Environnement et le Développement
Discussant: Mireille Chiroleu-Assouline, Paris School of Economics, University Paris 1 Pantheon-Sorbonne

Carbon Curse in Developed Countries

Mouez Fodha, University Paris 1 Pantheon-Sorbonne; **Mireille Chiroleu-Assouline**, Paris School of Economics, University Paris 1 Pantheon-Sorbonne; Yassine Kirat, University Paris 1 Pantheon-Sorbonne
Discussant: Thomas Eichner, FernUniversität

INTERNATIONAL ENVIRONMENTAL AGREEMENTS III

Room: Room 4.209

Chair: Eftichios Sartzetakis, University of Macedonia

Self-Enforcing International Environmental Agreements: Adaptation and Complementarity

Santiago J. Rubio, University of Valencia
Discussant: Basak Bayramoglu, INRA, UMR Economie Publique

With or Without the European Union: the Convention for the Protection of the Black Sea Against Pollution

Basak Bayramoglu, INRA, UMR Economie Publique; Corina Haita-Falah, University of Kassel, Department of Environmental and Behavioral Economics

Discussant: Sven Christens, University of Kassel

Water allocation treaties between upstream and downstream states

Sven Christens, University of Kassel

Discussant: Eftichios Sartzetakis, University of Macedonia

International Environmental Agreements and Trading Blocks. Can issue linkage enhance cooperation?

Eftichios Sartzetakis, University of Macedonia; Effrosyni Diamantoudi, Concordia University; Stefania Strantza, Concordia University

Discussant: Santiago J. Rubio, University of Valencia

POLICY INSTRUMENTS FOR ENERGY TRANSITION III

Room: Room 2.218

Chair: Nathaly Rivera, University of Alaska Anchorage

Incentives for Technology Investments in International Climate Policy

Ralph Winkler, University of Bern; Anna Kulakovskaya, University of Bern

Discussant: Elias Asproudis, Swansea University

Climate solidarity, green trade unions and timing of technological choice

Elias Asproudis, Swansea University; Eleftherios Filippiadis, Department of Economics, University of Macedonia, Greece; Mo Tian, Nottingham University Business School

Discussant: Nathaly Rivera, University of Alaska Anchorage

The U.S. Coal-To-Gas Power Plant Conversion Process and its Effects in Housing Prices

Nathaly Rivera, University of Alaska Anchorage; Scott Loveridge, Michigan State University

- Christian Gollier, President-elect of EAERE

Room: Lecture Theatre B

Lunch

Saturday, 12.45-14.00

-
- * Journal Board Meeting EDE – Room 3.213
 - * Journal Board Meeting ERE – Room 2.217
 - IAERE Meeting – Room 2.220

* - by invitation only

PARALLEL SESSION 8
SAT 14:00-15:45

THEMATIC SESSION: ELECTRIFICATION OF HEAT AS A STEPPING STONE IN THE GREEN TRANSITION

Room: Room 1.218

Organizer(s): Klaus Skytte, Technical University of Denmark; Lisa Ryan, University College Dublin
 Chair: Lisa Ryan, University College Dublin

Concerns about climate change and the desire for a more secure energy provision are inducing countries to continuously develop and deploy renewable energy technologies to replace fossil fuels. At present, wind power is the fastest growing renewable energy technology being deployed in Northern Europe. This calls for better coupling between electricity and other energy sectors in order to utilise the cheap wind energy potentials in the heat, gas and transport sectors. At the same time, the integration of large shares of wind energy and other variable renewable sources of energy into power system operations calls for flexibility in the entire energy system. The residential sector represented 25% of final energy consumption in the EU in 2016 and the main use (64.7%) of energy by households is for heating their homes. So, decarbonized electrification of the heat supply can mitigate the adverse effects of carbon-intensive heating systems and provide the flexibility needed to integrate higher shares of variable renewable sources of electricity into the system. The electrification of heating in the residential sector occurs through different channels: individual heating appliances as well as district heating systems. The technology mix in the heat supply will adapt with the electrification of heating; the use of biomass, as the main alternative fossil free technology to power-2-heat technologies will likely rise. Significant barriers remain to the electrification of heat through both channels; the heterogeneity of individual behavior and the influence of non-financial factors on consumer choice mean that residential energy use may perhaps be least amenable to economic incentives.

THEMATIC SESSION: NON-MONETARY PRICES IN STATED PREFERENCE ANALYSIS

Room: Room 1.219

Organizer(s): Daniel Rigby, University of Manchester
 Chair: Daniel Rigby, University of Manchester

In a recent discrete choice experiment concerning climate change-resilient water infrastructure in rural India respondents were randomly assigned money or labour as the payment vehicle (PV). While at the aggregate level there was no impact of PV on estimates of marginal utilities, there was evidence that (poorer, less educated) women are willing to work more but pay less compared to men. This suggests that the choice of numeraire is non-trivial when men and women have different preferences for the goods or services being valued. An increasing number of studies in the environmental valuation literature argue that monetary payment vehicles (PVs) are problematic when the relevant population is engaged primarily in subsistence activities. Crops such as rice and maize, everyday household items and meals to labourers have all been as alternative forms of PV but the most common non-monetary PV is labour contribution. Non-monetary payment vehicles have been argued to, inter alia, reduce hypothetical bias, increase certainty of responses, avoid sensitivities around money, reduce zero-bids and minimise the risk of offending village leaders. This session will review the evidence from, and implications of, the growing literature on non-monetary payment vehicles and to present new evidence on their use. The papers comprising the session will present new evidence from Ghana, Uganda, India and Kenya to assess implications of different PVs for assessing preferences and reducing hypothetical bias.

POLICY SESSION: ADVANCING ECONOMICS IN GLOBAL POLICY DISCUSSIONS

Room: Lecture Theatre A

Organizer(s): Kevin Boyle, University of Maine

Chair: Maria Loureiro, University Santiago de Compostela

Important environmental issues facing society such as climate change are global in nature and do respect neither geopolitical boundaries nor domains such as AFAERE, AERE, EAAERE, EARE, and LAERE. At the same tie, some populist political regimes around the world are rolling back key environmental policies, and communicating the relevance of concepts such as cap and trade and nonuse values to lay decision-makers is challenging. This session will explore how environmental economists can collaborate across disciplinary foci and geopolitical boundaries to advance efficient policies that can be harmonised across regions. One approach that will be discussed is assembling ad hoc teams to write white papers, an approach successfully instituted by the Urban Land Institute. The panel will discuss the development of a road map of collaboration to provide economic insights to address regional and global environmental concerns.

Panelist(s): Kevin Boyle, University of Maine;

Christian Gollier, Toulouse School of Economics;

Rodrigo Arriagada, Pontifica Catholic University of Chile;

Wisdom Akpalu, UNU - WIDER;

Paulo A.L.D. Nunes, U.N. Food and Agriculture Organization (FAO);
